SECOND PARTIAL CONSENT DECREE

3

2

WHEREAS, the United States of America (hereinafter "United 4 States"), on behalf of the Administrator of the United States 5 Environmental Protection Agency (hereinafter "EPA"), has filed 6 7 concurrently with this Second Partial Consent Decree a motion to amend the complaint originally filed on December 7, 1988, and 8 amended on May 11, 1989, in the matter captioned United States et 9 al. v. Chevron Chemical Company, et al., No. CV 88 7186 MRP(Kx), 10 pursuant to the Comprehensive Environmental Response, 11 Compensation, and Liability Act, 42 U.S.C. §§ 9601 et seq., as 12 amended by the Superfund Amendments and Reauthorization Act of 13 1986, Pub. L. No. 99-499, 100 Stat. 1613 (1986) (hereinafter 14 15 "CERCLA"). The amended complaint seeks to compel the Defendants (including those parties identified in Section II (Parties) of 16 17 this Second Partial Consent Decree, and hereinafter referred to 18 as "Cash-II Defendants" or "Defendants") to perform certain 19 remedial actions and to recover certain response costs that have 20 been and will be incurred by the United States in response to 21 alleged releases and threatened releases of hazardous substances 22 from the landfill known as the Operating Industries, Inc. site 23 (hereinafter "OII" or the "Site") located at 900 Potrero Grande 24 Drive, Monterey Park, California.

25

26

27

28

WHEREAS, the State of California, on behalf of the

Department of Health Services (hereinafter "the State") has

joined with the United States in the motion to amend the First

Amended Complaint previously filed in this matter pursuant to ~ CERCLA, the Hazardous Substance Account, California Health and 2 Safety Code §§ 25300, et seg., California Civil Code § 3494, and 3 California Health and Safety Code §§ 205 and 206 seeking to 4 compel the Defendants to perform certain remedial actions and to 5 recover certain response costs that have been incurred by the 6 State in response to alleged releases and threatened releases of 7 hazardous substances from the Site. 8 9 10 WHEREAS, the United States and the State allege that the 11 Operating Industries, Inc. landfill is a facility as defined in Section 101(9) of CERCLA, 42 U.S.C. § 9601(9). 12 13 14 WHEREAS, the United States and the State allege that the Defendants are persons, as defined in Section 101(21) of CERCLA, 15 42 U.S.C. § 9601(21), and California Health and Safety Code 16 § 25319 and that wastes and constituents thereof generated by the 17 Defendants sent to and disposed of at the Site, are "hazardous 18 substances," as defined in Section 101(14) of CERCLA, 42 U.S.C. 19 § 9601(14), and California Health and Safety Code §§ 25316 and 20 21 25317. 22 WHEREAS, the United States and the State allege that the 23 past, present, and potential migrations of hazardous substances 24 from the Site constitute actual and threatened "releases," as 25 defined in Section 101(22) of CERCLA, 42 U.S.C. § 9601(22), and 26 California Health and Safety Code §§ 25320 and 25321, and further 27

-6-

allege that the Defendants are persons subject to liability under

Section 107(a) of CERCLA, 42 U.S.C. § 9607(a), and California 1 Health and Safety Code § 25360. 2 3 WHEREAS, pursuant to Sections 121 and 122 of CERCLA, the 4 United States, the State and the Cash-II Defendants have each 5 stipulated and agreed to the making and entry of this Second 6 Partial Consent Decree (hereinafter "Decree" or "Second Partial 7 Consent Decree") prior to the taking of any testimony, and in 8 full settlement of the claims raised in the complaint. 9 10 WHEREAS, the United States and the State have previously 11 entered into a partial settlement concerning the Site with 12 13 certain other parties, that was memorialized in a Partial Consent Decree, entered by this Court and captioned, United States et al. 14 v. Chevron Chemical Company, et al., No. CV 88 7186 MRP(Kx), 15 (hereinafter referred to as the "first Partial Consent Decree" or 16 the "first Decree"), whereby the settling Defendants are 17 obligated to perform certain remedial work and to make payments 18 to the United States and the State. A copy of the first Partial 19 20 Consent Decree, as amended, is attached as Exhibit A.

21

22

23

24

25

26

WHEREAS, the United States, the State and the Cash-II Defendants have agreed upon a settlement pursuant to which the Cash-II Defendants agree to make payments to the EPA and the State for resolution of the claims set forth in the complaint filed in this action.

27

28

WHEREAS, the United States, the State and the Cash-II

Defendants agree that the settlement of the claims raised in the 1 complaint and entry of this Consent Decree is in good faith, in 2 an effort to avoid expensive and protracted litigation, without 3 any admission or finding of liability or fault as to any 4 5 allegation or matter. 6 NOW THEREFORE, it is ORDERED, ADJUDGED, AND DECREED as 7 8 follows: 9 **JURISDICTION** 10 I. 11 The Court has jurisdiction over the subject matter of this 12 action and the signatories to this Decree pursuant to CERCLA, 13 42 U.S.C. §§ 9601, et seq. and 28 U.S.C. §§ 1331, 1345, and 14 pendent jurisdiction over the claims arising under the laws of 15 California. The Cash-II Defendants shall not challenge the 16 Court's jurisdiction to enter and enforce this Decree. 17 18 Defendants listed in Section II (Parties) waive service of summons and, for the purpose of this Decree, agree to submit 19 themselves to the jurisdiction of this Court. 20 21 22 II. **PARTIES** 23 The Parties to this Decree are the United States of 24 A. America, the State, and the Cash-II Defendants. All actions 25 taken by the State pursuant to this Decree, including all 26

27

28

approvals, reservations of rights, and covenants not to sue are

solely those of the California Department of Health Services

1 (DHS) and of no other agency except that the California Attorney General also covenants not to sue the Cash-II Defendants, as 2 provided in Section XXX (Covenant Not to Sue) of the first 3 4 Partial Consent Decree. 5 Cash-II Defendants are defendants listed in Exhibit B 6 В. that have agreed to pay the specified amounts under the Schedules 7 also set forth in Exhibit B. 8 9 III. DENIAL OF LIABILITY 10 11 The Cash-II Defendants deny any and all legal or equitable 12 13 liability under any federal, state, or local statute, regulation, 14 ordinance, or common law for any response costs, damages or claims caused by or arising out of conditions at or arising from 15 the OII Site. By entering into this Decree, or by taking any 16 17 action in accordance with it, Cash-II Defendants do not admit any allegations contained herein or in the complaints, nor do 18 Defendants admit liability for any purpose or admit any issues of 19 law or fact or any responsibility for the alleged release or 20 threat of release of any hazardous substance into the 21 22 environment. Nothing in this Section shall alter the Cash-II Defendants' agreement not to challenge the Court's jurisdiction 23 24 as set forth in Section I (Jurisdiction). 25 26 IV. BINDING EFFECT 27

This Decree shall apply to and be binding upon the

1 signatories, their successors, and assigns. No change in

2 ownership or corporate or partnership status shall in any way

3 alter the Cash-II Defendants' responsibilities under this Decree.

4 Each Cash-II Defendant shall be responsible and shall remain

5 responsible for carrying out all activities required of that

6 particular Cash-II Defendant under this Decree.

7

8 V. <u>PURPOSE</u>

9

The purpose of this Decree is to resolve the dispute among
the Parties for the same "Covered Matters" as defined in
Paragraph H of Section VII (Definitions) of the first Partial
Consent Decree and Section XXX (Covenant Not to Sue) of the first
Partial Consent Decree, and to resolve the liability of the
Cash-II Defendants for those "Covered Matters."

16

17

18

19

20

21

22

23

24

25

26

27

28

It is the intention of this Decree to resolve the liability of two sets of Cash-II Defendants: (1) those Defendants who were issued general notice letters pursuant to Section 122(e) of CERCLA, 42 U.S.C. § 9622(e), before July 10, 1989 and who have not resolved their liability to date, ("the Nonsettlors"); and (2) those Defendants who were issued general notice letters on or after July 10, 1989 and before the date this Decree is lodged with the Court ("the 4th tier Defendants"). It is the purpose of this Decree to resolve the liability of the 4th tier Defendants for the "Covered Matters" using the same payment per unit of volume of manifested waste formula as applied to the Cash Defendants to the first Partial Consent Decree, and to resolve

the liability of the Nonsettlers for the "Covered Matters" using 1 2 the same payment per unit of volume of manifested waste formula plus a "premium" for the delay in reaching settlement and accrued 3 interest. 4 5 VI. INCORPORATION OF THE TERMS OF 6 7 THE FIRST PARTIAL CONSENT DECREE 8 9 A. The parties to this Decree agree that the terms of the first Partial Consent Decree, as amended, and as appended to this 10 Decree as Exhibit A, shall be incorporated into this Decree by 11 12 reference as if fully set forth below and shall be binding upon 13 the signatories to this Decree, except as expressly noted in this 14 Section below. 15 For the purpose of applying the terms of the first 16 В. 17 Partial Consent Decree to the Cash-II Defendants, the Second 18 Partial Consent Decree is controlling in the event any language 19 or term in this Decree conflicts with any language or term of the 20 first Decree. 21 22 For the purpose of applying the incorporated terms of the first Partial Consent Decree to the Cash-II Defendants, all 23 references to the "Defendant(s)" or "Cash Defendants" in the 24

27 Defendant.

28

25

26

and no Cash-II Defendant shall be considered to be a Work

first Decree shall be read to include the Cash-II Defendant(s),

D. For the purpose of applying the incorporated terms of the first Decree, all references to Attachment A of the first Partial Consent Decree shall be read to refer to Exhibit B of this Decree, and all references to Attachment C of the first Decree shall be read to refer to Exhibit C (Volumetric Totals) of this Decree.

E. 1. Cash-II Defendants shall be entitled to any potential reduction provided for by the first subparagraph of Paragraph H of Section XVIII (Reservation of Rights) of the first Partial Consent Decree.

2. For the purpose of applying the second subparagraph of Paragraph H of Section XVIII (Reservation of Rights) of the first Partial Consent Decree, nothing in this Second Partial Consent Decree shall alter the status of the "non-noticed PRPs." "Non-noticed PRPs" shall continue to mean any potentially responsible party under Section 107(a) of CERCLA which was not notified by EPA of its status as a potentially responsible party at the OII site as of the effective date of the first Partial Consent Decree.

VII. ADDITIONAL RESERVATIONS OF RIGHTS

A. Nothing in this Decree shall be construed to independently create any obligation or right between the Cash-II Defendants and any and all persons who are not parties to this Decree. Nothing in this Decree shall be construed as limiting

- 1 the Cash-II Defendants' right to seek contribution or
- 2 indamnification from any or all liable persons who are not
- 3 signatories to the Second Partial Consent Decree.

B. Nothing in this Decree shall limit the right of a

Cash-II Defendant from entering into, or limit the enforceability

of, a separate agreement(s) with any Defendant or any other

person(s) except the United States or the State of California,

9 for reimbursement of any payment made under this Decree.

10

11

VIII. PAYMENTS BY CASH-II DEFENDANTS

12

13

14

15

16

17

18

19

20

21

22

23

24

25

26

27

28

Each Cash-II Defendant listed in Exhibit B shall make payments to EPA and the State as set forth in Exhibit B. Except as may be specifically provided for in Exhibit B, all payments shall be made within thirty (30) days of notice of entry of this Decree. The payments of such amounts shall fully relieve each Cash-II Defendant of its responsibility for Covered Matters and shall entitle each Cash-II Defendant to Contribution Protection under Section XXIX (Contribution Protection) of the first Decree and to the Covenant Not to Sue under Section XXX (Covenant Not to Sue) of the first Decree with respect to all such Covered Matters, whether or not the other Cash-II Defendants fulfill their obligations under this Decree. If EPA and the State do not receive all payments on behalf of any Cash-II Defendant under this Decree, that Defendant shall not be entitled to any benefits of this Decree, including those incorporated under the provisions of Section XXIX (Contribution Protection) of the first Decree and

1	Section XXX (ovenant Not to Sue) of the first Decree.
2	
3	The checks shall reference the OII Site. For payments to
4	EPA, checks shall be made out to "First Interstate Bank of
5	California Cash Fund Account No. 1313815-001" and be sent to:
6	
7	Institutional Custody Services
8	First Interstate Bank of California
9	Attention: Department Manager
10	707 Wilshire Boulevard, W10-2
11	Los Angeles, California 90017
12	
13	For State of California payments, checks shall be made out
14	to the "California Department of Health Services" and sent to:
15	
16	California Department of Health Services
17	Toxics Substances Control Program
18	P.O. Box 942732
19	Sacramento, CA 94234-7320
20	
21	
22	A copy of all transmittal letters and a copy of the check
23	shall be sent to the EPA and State Project Coordinator, as
24	appropriate. The addresses for the Project Coordinators are as
25	follows:
26	
27	

(

1	For EPA:	
2		
3		EPA Project Coordinator - OII Site
4		Superfund Enforcement Section (H-7-1)
5		U.S. Environmental Protection Agency
6		1235 Mission Street
7		San Francisco, California 94103
8		
9	For the State:	
10		
11		OII Project Coordinator
12		Department of Health Services
13		Toxic Substances Control Program
14		1405 San Fernando Road, Suite 300
15		Burbank, California 91504
16		
17		IX. MODIFICATION
18		
19	Except as prov	ided for in this Decree, there shall be no
20	modification of thi	s Decree without written approval of EPA, the
21	State, the Cash-II	Defendants and the Court, or as ordered by the
22	Court.	
23		
24	x.	LODGING AND PUBLIC PARTICIPATION
25		
26	Pursuant to Se	ction 122(d) of CERCLA, 42 U.S.C. § 9622(d),
27	this Decree will be	lodged with the Court for thirty (30) days,
28	and the United Stat	es shall publish a Notice of Availability of

review to allow public comment prior to entry by the Court. The 1 United States will file with the Court a copy of any comments 2 3 received and the responses of the United States to such comments. 4 No Party shall be bound by modifications to this Decree 5 without its prior written consent, and consent to this Decree is 6 not consent to such modifications. 7 8 XI. CONTINUING JURISDICTION 9 10 The Court specifically retains jurisdiction over both the 11 subject matter of and the Parties to this action for the duration 12 13 of this Decree for the purposes of issuing such further orders or directions as may be necessary or appropriate to construe, 14 implement, modify, enforce or terminate the terms of this Decree 15 16 or for any further relief as the interest of justice may require. 17 XII. REPRESENTATIVE AUTHORITY 18 19 Each undersigned representative of the Parties to this 20 Decree certifies that he or she is fully authorized by the Party 21 to enter into and execute the terms and conditions of this 22 Decree, and to legally bind such Party to this Decree. 23 24 25 XIII. EFFECTIVE DATE 26 This Decree is effective upon the date of its entry by the 27 28 Court.

XIV. TERMINATION AND SATISFACTION

Upon full payment of all its obligations under Section VII of this Decree (Payments by Cash-II Defendants) and Section X (Escrow Account) of the first Partial Consent Decree and Exhibit B, each Cash-II Defendant shall have satisfied its obligations for Covered Matters under this Decree, and this Decree shall be terminated as to that Cash-II Defendant, provided that the termination shall not alter the following incorporated provisions of the first Partial Consent Decree: Section XVIII (Reservation of Rights), Section XXIX (Contribution Protection), Section XXX (Covenant Not to Sue) and such other continuing rights and obligations of that Cash-II Defendant as incorporated into the Second Partial Consent Decree.

XV. SECTION HEADINGS

The section headings set forth in this Decree and its Table of Contents are included for convenience of reference only and shall be disregarded in the construction and interpretation of any of the provisions of this Decree.

1	XVI. <u>COUNTERPARTS</u>
2	
3	This Decree may be executed and delivered in any number of
4	counterparts, each of which when executed and delivered shall be
5	deemed to be an original, but such counterparts shall together
6	constitute one and the same document.

)	WHEREAS, the United States of America (hereinafter "United
4	States"), on behalf of the Administrator of the United States
5	Environmental Protection Agency (hereinafter "EPA"), has filed
6	concurrently with this Partial Consent Decree a complaint in this
7	matter pursuant to the Comprehensive Environmental Response,
•	Compensation, and Liability Act, 42 U.S.C. \$5 9601 at meg., as
9	amended by the Superfund Amendments and Reauthorization Act of
10	1986, Pub. L. No. 99-499, 100 Stat. 1613 (1986) (hereinafter
11	"CERCLA"), seeking to compel the Defendants (those parties
12	identified in Section II (Parties) of this Partial Consent
1)	Decree, and hereinafter referred to as "Defendants") to perform
14	certain remedial actions and to recover certain response costs
15	that have been and will be incurred by the United States in
16	response to alleged releases and threatened releases of hazardous
17	substances from the landfill known as the Operating Industries,
10	Inc. site (hereinafter "OII" or the "Site") located at 900
19	Potrero Grande Drive, Monterey Park, California.
20	
21	WHEREAS, the State of California, on behalf of the
2	Department of Health Services (hereinafter "the State") has filed
:3	concurrently with this Partial Consent Decree a complaint in this
14	matter pursuant to CERCLA, the Hazardous Substance Account,
15	California Health and Safety Code \$5 25300, gt seg., California
16	Civil Code § 3494, and California Health and Safety Code §§ 205
7	and 206 seeking to compel the Defendants to perform certain
2 0	remedial actions and to recover certain response costs that have

PARTIAL CONSENT DECREE

1	been incurred by the State in response to alleged releases and
2	threatened releases of hazardous substances from the Site.
,	
4	WHEREAS, the United States and the State allege that the
5	Operating Industries, Inc. landfill is a facility as defined in
6	Section 101(9) of CERCLA, 42 U.S.C. § 9601(9).
7	•
•	WHEREAS, the United States and the State allege that the
•	Defendants are persons, as defined in Section 101(21) of CERCLA,
_	42 W.S.C. § 9601(21), and California Health and Safety Code
1	§ 25319 and that wastes and constituents thereof generated by the
2	Defendents sent to and disposed of at the Site, are "hazardous
3	substances," as defined in Section 101(14) of CERCLA, 42 U.S.C.
4	§ 9401(14), and California Health and Safety Code §§ 25316 and
5	25317.
6	
7	PHEREAS, the United States and the State allege that the
	pest, present, and potential migrations of hezardous substances
•	from the Site constitute actual and threatened "releases," as
0	defined in Section 101(22) of CERCIA, 42 U.S.C. § 9601(22), and
1	Celifornia Health and Sefety Code \$5 25320 and 25321, and further
2	allegs that the Defendants are persons subject to liability under
)	Section 107(a) of CENCIA, 42 U.S.C. 5 9607(a), and Colifornia
•	Health and Safety Code § 25360.
5	
6	WHEREAS, pursuant to Sections 121 and 122 of CERCIA, the
7	United States, the State and the Defendants have each stipulated

and agreed to the making and entry of this Partial Consent Decree

1	(hereinafter "Decree" or "Consent Decree") prior to the taking of
2	any testimony, and in full settlement of the claims raised in the
3	complaints.
4	
5	WHEREAS, the United States, the State and the Defendants
6	have agreed upon a settlement pursuant to which certain
7	Defendants are obligated to conduct certain remedial work and to
	make payments to the EPA and the State, and other Defendants are
9	obligated to make payments to the EPA and the State.
10	
11	WHEREAS, the United States, the State and the Defendants
12	agree that the settlement of the claims raised in the complaints
13	and entry of this Consent Decree is in good faith, in an effort
14	to avoid expensive and protracted litigation, without any
15	admission or finding of liability or fault as to any allegation
16	or matter.
17	
18	NOW THEREFORE, it is ORDERED, ADJUDGED, AND DECREED as
19	follows:
20	
21	I. JURISDICTION
22	
33	The Court has jurisdiction over the subject matter of this
24	action and the signatories to this Decree pursuant to CERCLA, 42
15	U.S.C. §§ 9601, et seg. and 28 U.S.C. §§ 1331, 1345, and pendent
16	jurisdiction over the claims arising under the laws of
27	California. The Defendants shall not challenge the Court's
	jurisdiction to enter and enforce this Decree Defendants listed

1	in Section II (Parties) waive service of summons and, for the
2	purpose of this Decree, agree to subsit themselves to the
3	juri-diction of this Court.
4	
5	II. PARTIES
6	
7	A. The Parties to this Decree are the United States of
•	America, the State, the California Mazardous Substance Account
9	and the Defendants. All actions taken by the State pursuent to
10	this Decree, including all approvals, reservations of rights, and
11	covenants not to sue are solely those of the California
	Department of Health Services (DMS) and of no other agency except
13	that the California Attorney General also covenants not to sue
14	the Defendants, as provided in Section XXX (Covenant Not to Sue).
15	Defendants are those entities listed herein.
16	
37	B. Settling defendants are either defendants that have
3 0	agreed to pay the specified amounts under the Schedules set forth
19	in Attachment A and are identified in Attachment A ("Cash
20	Defendants"), or other settling defendants that have agreed to
21	undertake the Work and certain other obligations set forth in
22	this Decree and are identified in Attachment B ("Work
23	Defendants").
24	
	III. DENIAL OF LIABILITY
26	
27	The Defendants deny any and all legal or equitable liability

under any federal, state, or local statute, regulation.

PARTIAL CONSENT DECREE

ordinance, or common law for any response costs, damages or claims caused by or arising out of conditions at or arising from the OII Site. By entering into this Decree, or by taking any action in accordance with it. Defendants do not admit any allegations contained herein or in the complaints, nor do Defendants admit liability for any purpose or admit any issues of law or fact or any responsibility for the alleged release or threat of release of any hazardous substance into the environment. Mothing in this Section shall alter Defendants' agreement not to challenge the Court's jurisdiction as set forth 10 11 in Section I (Jurisdiction). 12 13 IV. BINDING EFFECT 14 15 This Decree shall apply to and be binding upon the 16 signatories, their successors, and assigns. No change in 17 ownership or corporate or partnership status shall in any way 18 alter the Defendants' responsibilities under this Decree. Each Defendant shall be responsible and shall remain responsible for carrying out all activities required of that particular Defendant 21 under this Decree. The Work Defendants shall provide a copy of this Decree, as entered, and shall provide all relevant additions 22 23 to the Decree, as appropriate, to each person, including all 24 contractors and subcontractors, retained to perform the Work 25 contemplated by this Decree, and shall condition any contract for the Work upon compliance with this Decree. 27 111 28 111

PARTIAL CONSENT DECREE

Work Defendants shall be jointly and severally responsible
for the performance of the Work Defendants' obligations outlined
in this Decree. In the event of the inability to pay or
insolvency of any one or more of the Work Defendants, regardless
of whether or not that Work Defendant or Work Defendants enter
into formal bankruptcy proceedings, or in the event that for any
other reason one or more of the Work Defendants do not
perticipate in the implementation of the Work, the remaining Work
Defendants agree and counit to complete the Work and activities

26

15

A. The Operating Industries, Inc. landfill is a 190-acre facility, as that term is defined in Section 101(9) of CERCLA, 42 U S.C. § 9601(9), located at 900 Potrero Grande Drive, Monterey Park, California. The Site operated from 1948 through 1984, and, over the course of its operation, accepted industrial solid. liquid and hazardous wastes and municipal trash. Wastes accepted at the OII Site include hazardous substances as defined in Section 101(14) of CERCLA, 42 U.S.C. 5 9601(14) and California Mealth and Safety Code \$6 25316 and 25317.

27

D. The contaminants found at the Site include hazardous substances as defined by CERCLA § 101(14) or as defined by California Health and Safety Code \$4 25316 and 25317.

PARTIAL CONSENT DECREE

B. The Site is located on the southwestern flank of the Le

Merced hills (also called the Montebello hills), and is divided by the California Mighway 60 (Pomona Fraeway), which runs roughly east-west through the Site, dividing it into a 45-acre North Parcel and 145-acre South Parcel. The Site is located at the boundary between the San Gabriel groundwater basin to the north and the Los Angeles Coastal groundwater basin to the south. The important water-bearing units underlying the Los Angeles and San Gabriel Basins, as well as the Site, are from oldest to youngest.

upper Pliocene Pico Formation, lower Pleistocene San Pedro Formation, upper Pleistocene older alluvium (including "terrace

gravels"), and the Recent Alluvium (California Department of

Sunnyside aguifers. The lower Pliocene Repetto formation and

Priorities List (NPL) in October, 1984, and was subsequently

groundwater recharge area and the Rio Mondo River.

placed on the MPL in May, 1986, in accordance with

Section 105(a)(8) of CERCLA, 42 U.S.C. § 9605(a)(8).

Water Resources, 1961, 1966). The San Pedro Formation contains

the five major aguifers of the Los Angeles Coastal Plain and the

older formations are found at depths greater than 1500 feet. The

C. The Site was proposed for inclusion on the National

San Gabriel Basin, the Jackson, Mollydale, Lynwood, Silverado and

PARTIAL COMSENT DECREE

1. There have been releases of hazardous substances from
the Site and the Site poses numerous threats to human health an
the environment. The population in proximity to the Site inclu
the nearby residents of the City of Montebello and the City of
Monterey Park, those who travel on the section of the Pomona
Freeway which transects the Site, and workers in the several
businesses located on or near the Site.

P. EPA is currently performing the Benedial Investigation/
Feasibility Study ("RI/FS") at the Site. The RI/FS was begun in
11 1984. Phases I and II of this study have been largely completed,
12 nd EPA is currently finishing Phase II and initiating Phase III
13 of the RI. When the RI/FS is completed, it will result in the
14 selection, design and implementation of a final overall remedy
15 for the Rite.

VI. PURPOSE

The purpose of this Decree is to resolve the dispute among the Parties as to whether remedial action may be necessary for the Leachate Management and Site Control and Monitoring Operable Units, (as described in Appendices A and B) to protect the public health, velfare, and the environment from conditions which may be present at the OII Site; obtain reimbursement from the Defendants or certain of Plaintiffs' response costs; and settle any and all claims against Defendants asserted by Plaintiffs in the complaints filed in this matter.

PARTIAL CONSENT DECREE

19

20

21

i3

111

This Decree is also intended to serve the public interest by protecting the public health, welfare, and the environment from alleged releases and threatened releases of hazardous substances at or from the OII Site by the implementation by the Work Defendants of remedial actions and operations, monitoring, and maintenance outlined in Section IX (Work to be Performed) of this Decree. The Parties recognize that the final remedy will be 10 determined after completion of the RI/PS and execution by the EPA of a Record of Decision which determines the final remedy. All 11 Parties agree and the Court hereby determines that the remedies 12 selected by the Records of Decision which are the subject of this 13 Decree are consistent with the final remedy and are consistent 14 with the National Oil and Nazardous Substances Pollution 15 16 Contingency Plan, 40 C.F.R. Part 300 (hereinafter "Mational Contingency Plan" or "NCP"). The Work performed in the 17 18 implementation of these Operable Units shall meet the substantive 19 standards of all "applicable requirements" and "relevant and appropriate requirements" as those terms are defined in 40 C.F.R. 20 5 300.6, as generally described in CERCLA Compliance with Other 21 Environmental Statutes, October 2, 1985 (50 Fed. Reg. 47946, 22 23 Movember 20, 1985), as required by Section 121 of CERCLA, 42 U.S.C. § 9621, and as provided in Appendices A and B to this

PARTIAL CONSENT DECREE

1

VII.	DEFINITIONS
------	-------------

A. "Appendix A" shall mean the Record of Decision for the Leschate Management Operable Unit.

5

7

B. "Appendix B" shall mean the Second of Decision for the Site Control and Homitoring Operable Unit.

•

C. "Appendix C" shall mean the OII Landfill SCH and LHS Scope of Work.

11

D. "CERCLA" shall mean the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. 5 9601, at ang., as amended by the Superfund Amendments and Resuthorization Act of 1986, Pub. L. No. 99-499, 100 Stat. 1613 (1996).

16 17 18

39

21

E. "Contractor" shall mean the individual, company or companies retained by or on behalf of the Work Defendants to undertake and complete the Work. Each contractor and subcontractor shall be qualified to do those portions of the Work for which it is retained.

~~ 24

25

P. "Costs" or "Response Costs" shell mean oversight, administrative, enforcement, removal, investigative and remedial or other expenses incurred or to be incurred by EPA or the State relative to the OII Site.

20 ///

PARTIAL CONSENT DECREE

1 G. "Construction" shall mean the phases of the Work
2 involving the construction of the remedy, in accordance with the
3 Design documents, the RODs and this Decree.

4

M. "Covered Natters" shall mean those conditions which the alternatives selected in the RODs (attached as Appendices λ and B) are designed to remedy, the Work implemented under Section IX (Work to be Performed), oversight costs associated with the performance of that Work and for all past response 10 costs, including interest accrued thereon, incurred by the United States, the State and the California Nazardous Substance Account up to June 1, 1988. Covered Matters specifically do not include 13 removals, remedial actions which will be implemented pursuant to the final remedy, the gas control and any future operable unit(s), or any environmental condition which is identified in 15 the RI/FS (except to the extent those removals, remedial actions, or those environmental conditions are already covered by 27 18 Appendices A or B or the Work). The Parties also agree that 19 remedial actions for groundwater contamination, if any, are not

20 21 22

I. "DMS" shall mean the California Department of Health Services.

Covered Matters under this Decree.

24 25

26

21

J. "Defendants" shall include both the Cash Defendants and the Work Defendants. "Cash Defendants" shall mean those parties identified as Defendants and listed as such in Attachment A to this Decree. "Work Defendants" shall mean those parties

identified as Defendants and listed as such in Attachment B to this becree.

K. "Design(s)" shall mean the phases of the Work wherein engineering plane and technical specifications are developed for implementation of the remedial actions, in accordance with the Robe and this Decree and the EPA Superfund Remedial Design and Remedial Action Guidance, (EPA OSWER Directive No. 9355.0-4A, June 1986) ("RD/RA quidence").

1. "EPA" shall mean the United States Environmental 'rotection Agency.

M. "Environment" shall mean (1) the mavigable vaters, the vaters of the contiguous some, and the ecean waters of which the natural resources are under the exclusive management of the United States under the Fishery Conservation and Management Act. and (2) any other surface vater, groundvater, drinking vater supply, land surface or subsurface strate, or ambient air within the United States or under the jurisdiction of the United States. as defined in Section 101(8) of CERCLA, 42 U.S.C. 5 9601(8).

F. "Hazardous substances" shall mean any substance included in the definition of Section 101(14) of CERCLA, 42 U.S.C. 25 _ .9601(14), or as defined by California Health and Safety Code \$\$ 25316 and 25317.

111 111

PARTIAL CONSENT DECREE

10

11

12.

13

14

22

2 3 ·

O. "National Contingency Plan" or "MCP" shall refer to the 1 National Oil and Hazardous Substances Pollution Contingency Plan. 40 C.F.R. Part 300, and shall be used as that term is referred to in Section 105 of CERCLA, 42 U.S.C. & 9605.

P. "OII Site" or the "Site" shall mean the landfill located et 900 Potrero Grande Drive, in Monterey Park, California.

9 Q. "Oversight" shall mean inspection by the EPA, the United States Army Corps of Engineers (USACE), the State, or their representatives, of remedial work and all other actions necessary 12 to verify the adequacy of performance of activities and reports relating to the OII Site.

15 R. "Parties" shall mean the United States, the State and the Defendants. 16

18 5. "Plaintiffs" shall mean the United States, the State, 19 and the California Nazardous Substance Account.

21 T. "Plan(s)" shall mean the plans developed by the Work Defendants which detail the elements of Work to be conducted 22 23 pursuant to this Decree.

U. "Records of Decision" or "RODs" shall mean the documents 25 signed by the EPA Region IX Deputy Regional Administrator on July 31. 1987, and November 16, 1987 which describe the remedial 28 111

13

14

17

20

actions of two of the Operable Units to be conducted at the Site, and which are attached hereto as Appendices A and B.

V. "Release" shall mean any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discarding of barrels, containers, and other closed receptacles containing any hazardous substance or pollutant or contaminant) as defined in Section 101(22) of CERCIA, and California Health and Safety Code \$\$ 25320 and 25321.

W. "Report(s)" shell mean the reports developed by the Work Defendants in compliance with this Decree, detailing the Work and the results of its implementation.

X. "State" shall mean the State of California on behalf of the Department of Health Services.

Y. "United States" shall mean the United States of America.

2. "USACE" shall mean the United States Army Corps of Engineers.

AA. "Work" shall mean performance of the remedial alternatives selected in the Leachate Management and the Site Control and Memitering MODs, and actions approved pursuant to the provisions of Section IX (Nork to be Performed) herein, and Appendix C.

1 BB. "Work Completion Report" shall mean the report developed by the Work Defendants in compliance with this Decree, detailing the Work performed pursuant to this Decree.

VIII. PAYMENTS BY CASH DEPENDANTS

Each Cash Defendant listed in Attachment A shall make payments to EPA and the State as set forth in Attachment A. Except as specifically provided for in Attachment A, all payments shall be made within thirty (30) days of notice of entry of this 11 Decree.

12 13 Any such payments set forth in Attachment A not scheduled to be paid within thirty (30) days of notice of entry of this Decree \ shall be secured by a surety bond, a letter of credit or other 15 security device acceptable to EPA, which shall be delivared to EPA within thirty (30) days of notice of entry of this Decree. The payments of such amounts shall fully relieve each Cash Defendant of its responsibility for Covered Natters and shall

entitle each Cash Defendant to Contribution Protection under 21 Section XXIX (Contribution Protection) and to the Covenant Not to 22 Sue under Section XXX (Covenant Not to Sue) with respect to all 23 such Covered Natters, whether er not the other Defendants fulfill their obligations under this Decree. If EPA and the State do not receive all payments on behalf of any Cash Defendant under this 26 Decree, that Defendant shall not be entitled to any benefits of

this Decree, including those under the provisions of Section XXIX

(Contribution Protection) and Section XXX (Covenant Not to Sue).

The Work Defendants shall have no responsibility to the United States, EPA, the State, the California Masardous Substance 2 Account, any other Defendant, or any third party for any payment required of, or failure to pay by, any Cash Defendant under this Section.

IX. WORK TO BE PERFORMED

A. General Obligations Regarding the Work

10 11

32

1. The Work Defendants shall finance and perform, as set forth in this Decree, the implementation of the Work as required by this Decree and Attachments and Appendices hereto.

14 35

16

17

19

20

21

2. Motwithstanding any approvals which may be granted by the EPA, the State, or other governmental entities, the Work Defendants shall not be relieved of any and all liability, if any, which may arise from or relate to their acts or omissions or the acts or omissions of any of their contractors, subcontractors, or any other person acting on their behalf in the performance of the Work or their failure to perform or complete the Work.

22 23 24

25

27

28

3. The Work Defendants shall design, implement, and complete the Work in accordance with the MCP, and with the standards, specifications, and schedule of completion set forth in or approved by the EPA pursuant to this Section. The Court finds and the Parties agree that the Records of Decision, as set

PARTIAL CONSENT DECREE

forth in Appendices A and B, and the Work if performed in compliance with the requirements of this Decree, are consistent with the NCP. 4. All activities undertaken by any Defendant pursuent to this Decree shall be undertaken in accordance with the requirements of all applicable state and federal laws. regulations, and all "applicable" and "relevant and appropriate" federal and state environmental requirements as identified pursuant to Section XV (Compliance with Applicable Lavs and Regulations). 12 5. The Work Defendants shall select a contractor or 13 14 contractors to conduct the Work which has expertise in investigation, analysis and remediation of hazardous waste 16 problems, with particular expertise in site control and monitoring activities as well as the qualifications to design. 18 construct, operate and maintain a leachate treatment plant. All Work performed by the Work Defendants shall be performed by 19 20 qualified contractors in accordance with the conditions and 21 schedules specified in this Decree. EPA will contract with a qualified person to oversee and review the conduct of the Work 22 performed by Work Defendants.

6. Except where noted otherwise, all dates referred to in

this Decree or any Attachments and Appendices to the Decree are calendar days; however, should a deadline fall on a weekend or a

28 111

24

25

PARTIAL CONSENT DECREE

federal holiday, the deadline shall be construed to continue to the next business day.

7. While the Work Defendants may collect, treat, etage, and escure materials on-site, they may only radeposit material back into the Site with the explicit approval of EPA.

off-site in accordance with the EPA's Revised Procedures for Implementing Off-site Tournal Response Actions ("Off-site Policy") (EPA OSHER Directive 9814.11, November 11, 1987), if applicable.

The Work Defendants shall subsit all required reports
 pursuant to the provisions of Appendix C, this Section and
 Section XVI (Data Exchange).

10. The treetment facility constructed under the terms of this Decree shall not be used to treet wastes other than those associated with the OII Site.

 EPA will make available to Work Defendants relevant EPA Region 1% quidance documents.

13. If EPA disapproves work being performed by Work Defendants, the Work Defendants shall have ten (10) days from receipt of such disapproval, if mecessary, to correct the work, or a longer period if dessed appropriate by EPA.

1

PARTIAL CONSENT DECREE

=

B. Nork To Be Undertaken

This Nork and the applicable schedule and required

deliverables are described more fully in the DII Lendfill 6CK/LMS scope of Work ("Scope of Work"), attached as Appendix C to this becree. The Records of Decision for the Operable Units addressed in this Decree are set forth in Appendices A and B. In general terms, the Leachate Management Operable Unit involves design, construction and operation of a Leachate Treatment System (as defined in Appendix C)("LTS"). The Site Control and Monitoring operable Unit is intended to stabilize the OII Site during the involves operation, monitoring and maintanence of environmental systems at the Site.

1. Site Control and Monitoring

activities is to stabilise the Oil Site during the period prior to implementation of the finel remedy for the Site. These ctivities include control, meintenance, and monitoring of all systems at the Site, and system improvements. These systems include: gas extraction and the eir dike, leachete collection and treatment, irrigation, access roads, stormwater drainage, site security, and aloge repair and erosion control. EPA vill retain responsibility for Site security. The SCM activities vill be conducted in accordance with the EPA Site Control and

PARTIAL CONSENT DECREE

Monitoring Record of Decision, dated July 31, 1987 (attached listeto as Appendix B).

,

2. Leachate Management

5

11

17

14

15

16

17

18

The Leachate Management Operable Unit includes predesign. design, and construction of an onsite leachate treatment plant; and operation of the treatment plant following its completion. The objective of remedial predesign and design is to develop a complete design report, including complete design plans and specifications for a leachate treatment facility and its related facilities, including necessary pipelines. The leachate treatment facility will be located on the north parcel of the OII Fite and will be designed consistent with the EPA Leachate Management Record of Decision, dated November 16, 1987 (attached here's as Appendix A). The on-site treatment facility will be used to treat leachate and other liquids associated with the OII Site. The treatment facility will be designed to provide the flexibility required to treat varying qualities of liquids, and to allow for expansion to treat increased volumes of leachate or other liquids related to the CII Site as needed.

21 22 23

34

25

27

20

The objective of leachate treatment plant construction is to construct a complete functional treatment facility, and any related facilities specified in the Final LTS Design, as defined in Appendix C. The Work Defendants shall be responsible for furnishing, in accordance with the Final LTS Design, all plant, labor, equipment, and materials required for the treatment

3

Final Design documents for Site Control and Monitoring and Leachate Management, which shall include plans, specifications, construction schedules, and other pertinent information, shall be submitted to EPA in accordance with the schedule in Appendix C of this Decree.

facility, and related facilities at the OII Site, and shell

ensure that all facilities are complete and functional.

•

C. Funding Limitations to Work

10 11 12

13

The Parties agree with respect to the Work to be performed under this Section that the Work Defendants' obligation to expend Work Defendants' funds for (1) the Leachate Management System (as described in Appendix C) shall not exceed \$14,000,000 and (2) Site Control and Monitoring not relating to leachate management (as described in Appendix C) shall not exceed \$20,000,000, except as otherwise provided in this Paragraph C.

19 20

21

22

33

24

26

17

In the event that Work Defendants' funds referenced in the previous sentence are exhausted in the performance of the Work to be performed under this Decree, the Work shall also be funded pursuant to the provisions of Section VIII (Payments by Cash Defendants), Section X (Escrow Account) herein and Attachment A hereto, and Work Defendants agree to continue to perform the Work until these additional funds, if any, and any funds received pursuant to EPA's direction or from EPA, if any, are exhausted, or until nine months after the date the ROD for the final Site

D. Responsibility for Work

•

As to the Cash Defendants, the Work Defendants shall have

exclusive responsibility for the performance of the Work and the

Cash Defendants shall have no responsibility to the United

States, EPA, the State, the California Matardous Substance

Account, any other Defendant, or any third party for the

performance, or failure of performance, of the Work Defendants.

15

X. ESCROW ACCOUNT

16 17 18

19

20

Work Defendants shall establish the "OII Steering Committee Escrov Account - Consent Decree I" (Escrow Account), within ten (10) working days after the effective date of this Decree. The Escrov Account shall have one interest bearing account titled "Work" and one interest bearing account titled "Cash", and these accounts shall be segregated from each other.

23

26

22

A copy of the Escrow Agreement establishing the Escrow Account shall be sent to EPA and the State as soon as possible thereafter for approval primarily to ensure that the escrowed funds will be handled as set forth by this Decree. Neither EPA, established by this Section.

A. Money received from the Work Defendants shall be

.

A. Money received from the Work Defendants shall be deposited in the "Work" Escrow Account. The Escrow Agreement shall instruct and authorise the Escrow Manager to disburse the money in the "Work" Escrow Account for the following:

nor the State, through its approval of the terms of the Escro-

Account, guarantees the sufficiency of the Escrov Account

10

1. To pay the Work Defendants' contractor(s) for the Work:

11

 To pay for other expenses, including any incurred penalties, required to be paid by the Work Defendants pursuant to this Decree and Attachments hereto;

15 16

17

15

3. To reimburse the Maxerdous Substance Superfund for \$1,400,000 for past response costs incurred by EPA, as provided in Section XX (Reimbursement of Past Costs) within thirty (30) days of notice of entry of this Decree; and

20 21

4. To reimburse the State for \$500,000 for past response costs incurred by the State, as provided in Section XX (Reimbursement of Past Costs) within thirty (30) days of notice of entry of this Decree.

25

23

The Work Defendants shall deposit \$1,900,000 in the "Work"

Escrow Account within thirty (30) days of notice of entry of this

Decree.

PARTIAL CONSENT DECREE

1 B. Money received from the Cash Defendants listed in Attachment A. Schedule 1 shall be deposited in the "Cash" Escrov Account. The Escrow Agreement shell instruct the Escrow Manager to use the money in the "Cash" Escrow Account for the purposes and in the asounts directed by EPA and as provided for in Attachment A to this Decree. The purposes include the following: reliabursement of EPA future response and oversight costs, past response Costs. Work in excess of the Work Defendants' funding limitations pursuant to Paragraph C of Section IX (Work to be Performed), and for additional Site remediation work pursuant to Paragraph C of Section IX (Work to be Performed). Payments to 12 El's pursuant to this Paragraph B for reighursement of: (1) EPA pret response costs, including interest accrued thereon, as of June 1, 1988, will not exceed these actual costs which EPA 15 currently estimates to be in excess of \$21.500.000; and (2) EPA 16 costs for the oversight of the Work under this Decree will not 17 exceed these actual costs which EPA currently estimates will be 18 \$6,000,000. Use of the "Cash" Escrew Account for Work in excess of Work Defendants' funding limitations and additional Site 20 remediation work, as both are described in Paragraph C of 21 Section IX (Work to be Performed), shall be subject to the same provisions as the use of the "Work" Escrow Account for Work, and the provisions of Paragraph C of Section IX (Work to be Performed). 25 26

C. Other funds received pursuant to EPA's direction or from EPA, if any, shell be placed into the "Cash" Escrov Account.

D. Interest received on each Escrow Account shell be peid into the account on which it was received, may be used first to pay for the account fees thereon and then shell be used in the same manner and for the same purposes as the other funds in the account.

E. Payment of money by Defendants to the Escrow Accounts is not a fine, penalty or monetary sanction.

10 F. The Escrow Agreement shall require that the Escrow Manager prepare and submit to the Work Defendants monthly 12 statements on money received and disbursements for the prior thirty (30) days for both the "Work" and the "Cash" accounts, and the balances in the accounts as of the date of the statements. A copy of this monthly statement shall be sent promptly to EPA and the State. This monthly statement shall be included in the next 16 monthly progress report, unless a different schedule is agreed to 17 18 by EPA and the Work Defendants. In addition, within sixty (60) days of the establishment of the Escrov Account, and every ninety 19 (90) days thereafter, in conjunction with the issuance of the most recent regular monthly statement by the Escrow Manager, the 21 Work Defendants shall submit a financial report to EPA and the 22 23 State. The financial report shall include cash flow projections for the amount of money estimated to be necessary for the "Work" 24 Escrow Account expenses described in Subparagraphs 1 and 2 of Paragraph A of this Section, for the following ninety (90) day 26 27 period. Subject to the funding limitations in Paragraph C of Section IX (Work to be Performed), if the amount of money in the

28

111

	** Escrow Account is less than the amount projected by the
2	Mork Defendants' report to be needed for the following minety
3	(90) days, Work Defendants shall deposit in the "Mork" Escrov
4	Account, within thirty (30) days, sufficient money to bring the
5	level of the "Work" Escrow Account up to the amount projected to
6	be needed for the following minety (90) days.

7

10

11

13

G. Work Defendants shall subsit an annual report to EPA and the State which shall include a summary of money received and disbursements for the preceding twelve (12) month period. This financial report also shall identify, in a format corresponding to the SCM/LMS Master Plan described in Appendix C, all expenses incurred which the Work Defendants assert apply against the funding limitations in Paragraph C of Section IX (Work to be Performed).

15 16 17

10

The Parties shall use best efforts to coordinate on-site activity plane.

3

XII. QUALITY ASSURANCE/QUALITY CONTROL

5

A. The Quality Assurance/Quality Control ("QA/QC") Plan that the Work Defendants shall submit pursuant to Section IX (Nork to be Performed) and Appendix C to this Decree shall, where applicable, he prepared in accordance with current EPA guidance, Interia Guidelines and Specifications for Preparing Quality Assurance Project Plans, QAMS-005/80, and relevant EPA Region IX guidance. Additionally, the QA/QC Plan shall include procedures necessary for the implementation of trial test(s) of the pumping, treatment and any other process used as part of the Nork. The QA/QC plan shall include a description of the mechanism used to verify that the processes are operating within acceptable limits. Upon approval and notice by EPA to the Work Defendants, the Nork Defendants shall implement the Plan.

19

22

25

27

17

B. The Mork Defendants shall use QA/QC procedures in accordance with the QA/QC plans submitted pursuant to this Decree, and shall utilize standard EPA chain of custody procedures, as documented in the <u>Mational Enforcement</u>

Investigations Center Policies and Procedures Manual as revised in Ney 1986, and the <u>Mational Enforcement Investigations Center</u>

Manual for the Evidence Audit, published in September 1981, for all exepte collection and analysis activities, unless other procedures are approved by EPA. In order to provide quality

assurance and maintain quality control regarding all emples collected pursuant to this Decree, the Work Defendants shall ensure that the following QA/QC measures are employed at laboratories utilized for analyses:

5

 Any leboratory utilized by the Work Defendants for analysis of samples taken pursuant to this Decree shall provide for access of EPA personnel and EPA authorized representatives to assure the accuracy of laboratory results related to the OII Site.

10 11 12

14

2. Any laboratory utilized by the Work Defendants for analysis of samples taken pursuant to this Decree shall perform all analyses according to EPA methods or methods deemed satisfactory to EPA and submit all protocols to be used for analysis to EPA in the plans and documents required under this Decree.

10

21

22

17

3. All laboratories utilized by the Work Defendants for analysis of samples taken pursuant to this Decree shall participate in an EPA or EPA equivalent QA/QC program. As part of the QA/QC program and upon request by EPA, such laboratories shall perform, at no coet to Plaintiffs, analyses of samples provided by EPA to demonstrate the quality of each laboratory's data.

26 ///

27 ///

28 ///

The EPA Project Coordinator or On-Scene-Coordinator

shall also have the authority to require a cossation of the performance of the Work or any other activity at the Site, if EPA

determines that the Work or such activity may present or

contribute to an endangerment to public health, welfare, or the

environment or cause or threaten to cause the release of

hazardous substances from the Site. In the event the EPA Project

Coordinator or On-Scene-Coordinator takes any action which

results in the delay of the Work or any other activity required

by this Decree, the Parties may if necessary extend the

compliance schedule of this Decree for only that amount of time 11

which EPA determines is necessitated by the event. Should the

13 Work Defendants desire to extend the compliance schedule pursuant

to this Section, the Work Defendants shall propose an extension

and the EPA shall determine the length of any extension. If the 15

EPA Project Coordinator takes any action which results in the

delay of the Work or any other activity required by this Decree 17

for any of the reasons set forth in this Paragraph and those

19 reasons are due to the acts or omissions of the Work Defendants

or the Contractor(s), then any extension of the compliance

schedule shall be at EPA's discretion. The absence of the EPA

Project Coordinator from the Site shall not be cause for stoppage

23 of the work.

21

22

24

25

XIV. SITE ACCESS

12

13 A. To the extent that the Site or other areas where Work is to be performed is presently owned or controlled by parties other then those bound by this Decree or to the extent that access to 15 or essements over property is required for the proper and complete performance of this Decree, the Nork Defendants shall 17 use their good faith efforts to obtain access agreements from the 10 19 present owners or those persons the have control over the property, including lessees. Site access agreements shall 20 provide reasonable access to the Defendants, the Work Defendants' contractor(s), the United States on behalf of EPA and USACE, the 22 State and local agencies, and their authorised representatives. In the event that Work Defendants are mable to obtain necessary access agreements sixty (60) days in advance of the meed for such 25 access, Nork Defendants shall notify Plaintiffs regarding the lack of and the efforts to obtain such agreements. If Nork Defendants fail to gain access within sixty (60) days, they shall

continue to use good faith efforts to obtain access. If the
Plaintiffs and Work Defendants, through continued joint or
individual efforts, are unable to obtain such access, or suitable
alternative access, a <u>force majoure</u> event shall be deemed to have
occurred, and the affected work shall be modified, if necessary,
by mutual agreement of the Work Defendants and Plaintiffs, to
take into account the lack of such access.

J

of the OII Site, and in light of the fact that EPA intends to
continue to provide site security and control access to portions
of the Site, EPA agrees to provide reasonable access to those
technical representatives of Work Defendants required to carry
out the field work detailed in this Decree. Within seven (7)
days of the effective date of this Decree, Work Defendants shall
provide the EPA Project Coordinator with a list of necessary
personnel and their company affiliations, to be added to the lis
of persons who shall be provided access to the Site. This list
can be amended as necessary. Upon request, EPA will provide
access to other representatives of Defendants, as is necessary
and appropriate.

22

28

23 B. The EPA, the USACE, the State, and their
24 representatives, including contractors, reserve all rights under
25 Section 104 of CERCIA and, during the effective period of this
26 Decree, shall have access at all times to the Site and, during
27 reasonable times with reasonable notice, to any contiguous

1	property owned or controlled by any Defendant, for activities,
2	including but not limited to:
3	
4	 Monitoring the progress of activities taking place;
5	
6	2. Verifying any data or information submitted to EPA:
7	
•	3. Conducting investigations relating to contamination
, 9	at and near the Site;
10	
11	4. Obtaining samples at the Site.
12	
13	As to activities relating to the Site, the EPA, the USACE,
14	the State, and their representatives shall also have access for
15	the purposes of inspecting and copying records, operating logs,
16	contracts, or other documents as specified in Section XVI (Data
17	Exchange).
10	
19	Any person obtaining access to the Site pursuant to this
30	provision shall comply with all applicable provisions of the Work
21	Defendants' worker health and safety plan as submitted pursuant
22	to Section XI (Worker Health and Safety Plan) and Appendix C of
23	this Decree,
24	
\$	XV. COMPLIANCE WITH APPLICABLE LAWS AND REGULATIONS
26	
27	All actions required to be taken by any Party pursuant to
26	this Decree shall be undertaken in accordance with the
	PARTIAL CONSENT DECREE 36

obtain, or cause their contractors to obtain, except as provided in Section 121(a)(1) of CERCLA, all permits and approvals necessary under such laws and regulations. XVI. DATA EXCHANGE A. The Defendants shall make the results of all sampling 9 and/or tests or other data generated by the Defendants, or on the 10 Defendants' behalf, with respect to the implementation of this 11 Decree available to EPA in accordance with the provisions of this 12 Decree. EPA will make available to the Work Defendants the results of sampling and/or tests or other data similarly generated by EPA. 16 17 B. Under the provisions of Section 104(e) of CERCLA, EPA and the State explicitly reserve the right to observe the Work of 18 19 the Work Defendants as it is performed. In addition, at the request of EPA or the State, the Work Defendants shall allow 20 aplit or replicate samples to be taken by EPA or the State and/or 22 their authorized representatives, of any samples collected by the 23 Work Defendants or any one acting on the Work Defendants' behalf 24 pursuant to the implementation of this Decree. To the extent 25 practicable, any such observation and sample collection shall be coordinated through the BPA Project Coordinator. At the request 26 27 of Work Defendants, Plaintiffs and/or their authorised representatives shall allow Work Defendants to split or replicate

requirements of all applicable federal, state, and local leve. and regulations, including the MCP. Work Defendants shall

representative	J.				

C. The Party performing sampling for the purposes of implementing this Decree shall notify the other Parties as soon as possible but no less than seven (7) days in advance of any staple collection activity, and the party desiring to take split samples shall inform the other party at least three (3) days prior to the scheduled sampling event. The Party performing the the sampling activity shall inform the other Parties at least twenty-four (24) hours in advance if the planned sampling echedule cannot be set. Notwithstanding the foregoing, within 13 seven (7) days after the approval of any mampling plan (including the schedule for implementation), Work Defendants shall notify 15 Pleintiffs of the intended date of commencement of the manuling activity. EPA shall be notified thirty (30) days prior to the disposal of any such samples, and EPA shall have an opportunity 17 10 to take possession of all or a portion of such samples.

D. The Work Defendants need not provide EPA with seven (7) day notice of routine sampling relating to the operation of the treatment system; however, the Work Defendants shall provide EPA with a schedule for all routine sampling. The Work Defendants shall notify EPA seven (7) days in advance of any changes in the routine sampling schedule. The Work Defendants need not provide E> with advance notice of changes in the treatment system routine sampling as a result of unexpected conditions. The Work Defendants shall, however, notify EPA within forty-eight (48)

l	hours of such occurrence and shall provide EPA with the results
1	of analysis of such sampling when the results become available.

- 2. Plaintiffs and Defendants agree to exchange technical
 data and information relating to environmental and public health
 issues, site conditions, site use and history, and regional
 environmental conditions relating to the performance of the Work
 or which would be covered by the provisions of Section 104 of
 CERCLA, as such data and information becomes available, including
 but not limited to:
- 12 1. Raw analytical, monitoring, sampling, geographical,
 hydrogeological, geologic, meteorological, surface
 water, landfill gas, subsurface gas, or ambient air
 data, resulting from any environmental testing relating
 to the OII Site;
- 2. Technical working drafts and final reports, letter
 reports, work plans, documents, memorands, status
 reports, and written material, any of which are
 developed using data generated by the Work Defendants
 as part of the implementation of this Decree or
 generated by Plaintiffs relating to the OII Site;
- 3. All technical maps, computer generated graphics,
 charts, tables, data sheets, geologic cross-sections,
 lithologic logs, graphs, photographs, slides, or

3	other	such	material	developed	relating	to	the	01
2	Site;	and						

 Computerized compilations of technical data and information relating to the OII Site, including the display and organization of data bases.

Summaries and tabulations of laboratory data may be reviewed for
 clerical and gross laboratory handling errors prior to submission
 pursuant to this Paragraph.

12 F. The Parties shall provide notice in a timely manner of
13 any project which is likely to produce data or information
14 subject to this Section.

G. Defendants recognize that the data and reports generated under this Decree are not subject to the protection of Section 1905 of Title 18 and 40 C.P.R. Part 3 as confidential information. Moreover, the Parties explicitly recognize that the provisions of Section 104(e)(7)(f) of CERCIA apply to data and information generated by the Defendants. The Work Defendants shall not assert a claim of confidentiality regarding any hydrogeological or chemical data, or any data submitted in support of the Work. Defendants reserve their rights to assert a infidentiality claim for all other information pursuant to Section 1905, Title 18 and 40 C.P.R. Part 2, and any applicable state laws and regulations. The provisions of this Section shall not constitute a waiver of any applicable claims of attorney work

....

product or attorney client privilege. In addition, the United

States reserves all its rights with regard to information

otherwise not subject to disclosure under applicable law. The

State is not obligated to provide any materials pursuant to this

Section which are subject to applicable attorney work product

claims, attorney-client privilege, or which the State is not

required to disclose under California Government Code Section

6254, except that Section 6254(b) shall not apply to the extent

that the State has made requested materials available to parties

to any pending litigation.

11

12 N. All data, factual information, and documents submitted
13 by the Defendants to EPA and the State pursuant to this Decree
14 and determined by EPA or the State, as appropriate, not to be
15 confidential shall be subject to public inspection.

16

17 I. If any of the Cash Defendants wish to perform any
18 sampling activity on or contiguous to the Site, they shall first
19 provide notice to the Project Coordinators and obtain permission
20 from EPA and the contiguous property owner if such owner is a
21 Defendant. In such an event, the provisions of this Section
22 shall apply to that Cash Defendant.

23

26

27

J. Subject to Paragraph G above, any Cash Defendant shall, at its request in writing, have access to all data, factual information and documentation generated under this Decree or described in Section IX (Work to be Performed) and Appendix C.

The cost of copying shall be borne by the Cash Defendant. Any

such data, factual information or documents obtained by any Cash Defendant shall be subject to the provisions of this Section.

)

MVII. RETENTION OF RECORDS

3

The Defendants shall preserve and retain all records and documents now in their possession or control of their divisions, employees, agents, accountants, contractors or attorneys which relate to the performance of the Work or which would be covered by the provisions of Section 104 of CERCLA, regardless of any document retention policy to the contrary, during the pendancy of this Decree and for six (6) years after its termination.

13

ĭi

15 Until this six (6) year period expires, the Defendants shall preserve, and shall instruct all contractors, all contractor's 17 subcontractors, and anyone else acting on the Defendants' behalf at the DII Site to preserve (in the form of originals or exact copies, or in the alternative, microfiche of all originals) all 19 20 records, documents and information specified above. During this 31 six (6) year period following the termination of this Decree, if requested by EPA or the State, originals or copies of all such 22 records, documents, and information shall be delivered to the EPA 24 and the State Project Coordinators or designees, as appropriate. 25 After this six (6) year period, the Defendants shall notify the 26 EPA and the State no later than sixty (60) calendar days prior to the destruction of any such documents. Upon request by EPA or the Siste made within thirty (30) days of such notice, the

42

Defendant proposing to destroy records shall make available to

2 the EPA or the State, as appropriate, originals or copies of any

3 such records prior to their destruction. The United States and

4 Defendants are not obligated to provide any materials pursuant to

5 this Section which are subject to applicable attorney work

6 product claims or attorney-client privilege, or both. In

7 addition, the United States reserves all its right with regard to

8 information otherwise not subject to disclosure under applicable

lav.

10

EPA shall preserve and retain all records and documents now 11 in their possession or control or in the possession or control of 12 their divisions, employees, agents, accountants, contractors or 13 attorneys which relate to any field activities at the OII Site 14 performed by EPA, are received under the provisions of Section 104 of CERCIA, or which relate to the performance of the Work under this Decree, as required by the EPA Office of Information Resources Management Document Mumber 2160, entitled 10 Records Management Manual and the corresponding EPA Records 19 Management Manual, Appendix B, Records Control Schedules.

21 22

23

The State shall preserve and retain all records and documents now in its possession or control or in the possession or control of its divisions, employees, agents, accountants, contractors or attorneys which relate to the performance of the Mork under this Decree or which relate to activities performed or investigations, or anforcement actions taken by the State at the OII Site regardless of any documents retention policy to the

Decree, the	United States, SPA and the State reserve the right to
take any en	forcement action pursuant to CERCLA and/or any other
authority,	including the right to seek response costs, injunctive
relief, mon	etery penalties, and punitive damages.
C. No	twithstanding any other provision in this Decree, the
Covenant No	t to Sue, as provided in Section XXX (Covenant Not to
Sue), shall	not relieve any Defendant of its obligation to meet
and maintai	n compliance with the requirements set forth in this

Defendants are not released from liability for any matters beyond

the terms of this Decree. For metters beyond the terms of this

15 D. In the event EPA determines that the Work Defendants 16 have failed to implement any provisions of the Work in an

to take enforcement actions for violations of this Decree.

Decree. The United States, EPA and the State reserve all rights

17 adequate or timely manner, or in the event of an imminent or

18 substantial endangerment to the public health or welfare or the 19 environment, EPA may perform any and all portions of the Work as

20 it determines may be necessary, subject to the reimbursement

21 provisions of Paragraphs A and B of Section XIX (Reimbursement of

Puture Response and Oversight Costs). If the EPA decides to 22

perform work which is the subject of this Decree, the EPA will 23

24 provide the Work Defendants' and the State's Project Coordinator

25 with advance notice thereof and, to the extent practicable, the

26 opportunity for consultation regarding EPA's intention to perform

27 a portion of or all of the Work. EPA and the State may agree

28 111

that the State may perform work pursuant to the provisions of this Paragraph.

3

7

10

13

-- 11

E. Bothing in this Decree shall be deemed to limit the response authority of EPA under Section 104 of CERCLA, 42 U.S.C. § 9604, and under Section 106 of CERCLA, 42 U.S.C. § 9606, or under any other federal response authority, except to the extent that Defendants have a Covenant Not to Sue for Covered Natters under Section XXX (Covenant Not to Sue). Nothing in this Decree shall be deemed to limit the response authority of the State under Section 25358.3 of the California Nealth and Safety Code or under any other response authority, except to the extent that Defendants have a Covenant Not to Sue for Covered Natters under Section XXX (Covenant Not to Sue).

14

16 F. Except as provided in Section I (Jurisdiction). 17 Faction IV (Binding Effect) and Section XXXVII (Claims Against 18 the Fund), Defendants expressly reserve all legal and equitable 19 rights and defenses that they may have under this Decree, CERCLA, 20 or any other legal authority, including all arguments concerning compliance with the specific tasks and requirements of this Decree. Except as provided in this Decree and Section 113(f)(2) of CERCLA, this reservation of rights applies to all claims, 24 actions and defenses of Defendants against non-settlers, the United States, the State of California, EPA or any others and to 25 those assertable between and among the individual Defendants. 27 Except as provided in Section XXVIII (Defendants' Right of Contribution and Indeanity and Covenant Not to Sue Each Other)

and Section XXXVII (Claims Against the Fund), or otherwise in

2 this Decree, these rights include, but are not limited to, the

3 right to seek reimbursement for response actions taken and

response costs paid by any of the Defendants at any time.

5

G. Defendants reserve any and all rights of contribution
from any or all persons who are not Defendants as defined herein
for all costs incurred by Defendants under this Decree or
otherwise complying with the requirements of this Decree.

Nothing in this Decree shall be construed as limiting Defendants'
right to seek contribution from any or all liable persons who are
not Defendants.

12

14 H. In reaching this settlement, the Parties looked to a calculation which did not specifically address individual 15 defenses or hazardous substances deposited by persons not parties 16 17 to this Decree. Rather, the Parties have allocated costs in a general fashion reflective both of the volumes of wastes 18 deposited at the Site by the Defendants and of the nature of each 20 Defendant's participation in this Decree. If an allocation is 21 performed at the time a final remedy has been chosen, for the 22 purpose of resolving any liability remaining at that time, and if it is determined that a Defendant's relative share of liability 23 24 (expressed as a percentage) is less than what was calculated for the purposes of this settlement, as reflected in Attachment C. 25 the payment otherwise required in the resolution of final site 26 27 liability should be reduced by an amount corresponding to the Percentage Reduction of a Defendant's relative share of liability 28

3	times either the amount paid by a Cash Defendant, or the amount
3	paid and the value of Work performed in accordance and in full
)	compliance with this Decree, by a Work Defendant in this
1	settlement. The Percentage Reduction should be determined by
•	dividing a Defendant's reduction in relative share of liability
5	determined by an allocation made, if any, at the time of final
,	settlement by that Defendant's relative share of liability among

Defendants as reflected in Attachment C.

9.

26

27

10 For purposes of this Paragraph H, the value of Work 11 performed for each Work Defendant shall be the greater of the value of all costs incurred consistent with the MCP (excluding 33 penalties) in performing the Work pursuant to this Decree, or an 14 amount equal to \$11,500 per 0.01% for the volume indicated for that Work Defendant in Attachment C. Notwithstanding the above, 15 16 it is intended that any reallocation to "non-noticed PRPs" 17 resulting from the application of any credit pursuant to this 10 Peragraph H shall be based upon the amount of the credit which is reflected by the payments made by the Cash Defendants and the 20 amount paid and the actual costs to the Work Defendants in 21 performing the Work consistent with the MCP (excluding penalties). "Mon-noticed PRPs" shall mean any potentially 2) responsible party under Section 107(a) of CERCLA which has not been notified by EPA of its statue as a potentially responsible party at the OII Site as of the effective date of this Decree.

The Parties agree that this credit provision will not apply if the use of the credit would result in the United States or the

48

State of California not recovering their total coats for the final Site remedy. The Parties further agree that this provision shall not be construed as any restriction of joint and several liability under CERCLA, nor shall it be construed as any commitment on the part of the United States to use the Hazardous Substance Superfund to pay for any portion of the cost of the final remedy or any other response activities. In addition, this Paragraph N shall not restrict, in any way, the United States' or EPA's or the State's ability to recover those costs not recovered under this Decree from the appropriate persons potentially liable 10 under Section 107 of CERCLA. In the event that the United States 11 or the State reach a settlement with some or all of the 12 appropriate potentially responsible persons under Section 107 of 13 14 CERCLA regarding their ultimate liability for costs incurred or work to be performed at the OII Site on any terms, this Paragraph 15 H shall not be the basis for an objection to such settlement or a 16 motion for entry of any future Consent Decree by any signatory to this Decree. 10 19

20 I. In no case shall any Defendant be entitled to a refund 21 or to assert a claim against the Superfund under 22 Sections 106(b)(2) or 112 of CERCLA for any amount paid, or 23 expended, under this Decree even if that Defendant is later 24 determined, based upon its assertion of defenses in a subsequent 25 proceeding, to be not liable for response costs for the Site or 26 to be liable for response costs less than those paid, or

28 ///

expended, pursuant to this Decree.

J.	Nothing in	this Secti	ion shall	limit an	y Defendant	'B
right to	a Covenant	Not to Suc	under S	ection XX	X (Covenant	Not to
Eue) or	Contributio	n Protectio	n under	Section X	XIX (Contri	bution
Frotecti	on) for all	Covered Na	ttere.			

XIX. REINBURSENENT OF FUTURE RESPONSE AND OVERSIGHT COSTS

A. The Work Defendants shall relabures EPA's Masardous Substance Superfund or the State for the costs incurred for any activities outlined in Section IX (Work to be Performed) which are performed by EPA or the State, pursuant to the provisions Paragraph D of Section XVIII (Reservation of Rights). These costs 12 1) shall be subject to the funding limitations of Paragraph C of Section IX (Mork to be Performed). The Work Defendants shall, within thirty (30) calendar days of receipt of demand for payment, remit a check for the amount of those costs made payable to the Mazardous Substance Superfund, or the Dopartment of Mealth Services, as appropriate.

3. Reimbursement under this Section shall also be required in the event that EPA determines that Work Defendants have failed to perform any meterial mortion of the Work or have performed any portion of the Work in a substantially inadequate or substantially untimely manner, or in the event of an imminent and substantial endangerment to public health or welfare or the environment resulting from the performance of, or failure to perform. Work by the Work Defendants. If EPA or the State assumes performance of any portion of the Work based on such a

1	determination, the Work Defendants shell, within thirty (10)
2	calendar days of receipt of demand for payment, remit a check for
3	the amount of those costs made payable to the Hazardous Substance
4	Superfund or the DMS, as appropriate. In such an event, the
5	funding limitations of Paragraph C of Section IX (Work to be
6	Performed) shall not apply.
7	
•	C. Defendants shall reimburse the Hazardous Substance
9	Superfund for the costs incurred by EPA to oversee and review the
0	work under this Decree. These payments shall be made in the
11	amounts set forth and as described in Paragraph B of Section X
12	(Escrow Account), Section VIII (Payments by Cash Defendants) and
13	Attachment A to this Decree.
14	
15	D. Any payment made pursuent to this Section shall not
16	constitute an admission by Defendants of any liability to EPA,
7	the State or any other person or agency. The checks shall
	reference the OII Site, and be addressed to:

	P.O. Box 942732
	Secramento, CA 94234-7320

A copy of the transmittal letter and a copy of the check
shall be sent to the EPA or State Project Coordinator, as
appropriate.

XX. REINBURSEMENT OF PAST COSTS

A. Defendants agree to reinburse the Hezardous Substance Superfund for certain past response costs which have been incurred by EPA in responding to the conditions at the OII Site, including costs for emergency response actions which have been taken at the OII Site, remedial investigation activities performed by EPA and its contractor, and site control and monitoring activities. EPA will provide Defendants with a copy of the appropriate SFUR (Software Package for Unique Reports, EPA's Superfund accounting system document) which provides an accounting of its costs for the period up to and including June 1, 1988. EPA will also provide a summary accounting of its indixect and interest cost calculations. These reinbursements shall be made in the ancusts set forth and as described in Section VIII (Payments by Cash Defendants), Section X (Escrow Account) and Attachment A to this Decree. Noth Defendants shall

1	pay \$1,400,000 in EPA past response costs, as provided for in
2	Section X (Escrow Account). A copy of all transmittal letters
3	and a copy of all checks shall be sent to the EPA Project
4	Coordinator.
5	

B. Defendants agree to reimburse the State of California

Hazardous Substance Account for certain past response costs which
have been incurred by the State in responding to conditions at
the OII Site. The State will provide the Defendants an
accounting of its costs for the period up to and including
June 1, 1988. These payments shall be made in the amounts set
forth as described in Section VIII (Payments by Cash Defendants),
Section X (Escrow Account) and Attachment A to this Decree. Work
Defendants shall pay \$500,000 in past response costs, as provided
for in Section X (Escrow Account). A copy of the transmittal
letter and a copy of the check shall be sent to the State Project
Coordinator.

C. Such payments by Defendants to the EPA and the State as provided in Paragraphs A and B above, are not a panalty, fine or monetary sanction of any kind.

XXI. PRIORITY OF CLAIMS

In any contribution action, the rights of any Defendant shall be subordinate to the rights of the United.States or the State, pursuant to the provisions of Section 113(f)(3)(C) of CERCIA.

XXII. STIPULATED PENALTIES

triggering event, shall be submitted to the United States in

accordance with Section XXV (Form of Motice), berein

forwarding the check, including a brief description of the

A. General Provisions

1. Etipulated penalties shall apply for untimely or
intdequate submittals or Work required under the terms of this

Decree axcept where due to the occurrence of a force majauka

event, pursuant to Section XXIII (Earca Majauka). Penalties

shall apply from the first day after the deadline for performance of a requirement of this Decree until the requirement is

autistied.

2 For inadequate submittals or Work, EPA shall provide to Defendants, as soon as possible, eral notification of the occurrence of an event which triggers stipulated penalties, with vritten confirmation within seven (7) days of the occurrence of that event. In the event that EPA fails to so notify Defendants, stipulated penalties shall socrue from the date on which Defendants receive such motios.

Stipulated penalties under this Peregraph shall be paid upon demand, by certified check made payable to the Masardous jubstance Superfund, and addressed as indicated in Section XIX (Reimburnement of Puture Response and Oversight Costs) and shall be paid within thirty (30) days of receipt of the demand for payment of atipulated penalties. Pailure to pay a stipulated panalty on time shall also constitute such an event subject to stipulated penalties. A copy of the check and the letter

PARTIAL CONSENT DECREE

ī

4. Notwithstanding the atipulated penalties provisions of
5 this Section, and to the extent authorised by law, EPA or the
7 state may alect to assess civil penalties or bring an action in
8 District Court to enforce the provisions of this Decree. Payment
9 of atipulated penalties shall not praclude EPA or the State from
10 electing to pursue any other remedy or sanction to enforce this
11 Decree, and nothing shall preclude EPA or the State from seeking
12 statutory penalties against the Work Defendants for violations of
13 statutory or regulatory requirements relating to the performance
14 of the Work under this Decree, provided that the total shall not
15 exceed \$25,000 per day per violation.

5. In the event the EPA or the State essues the

performance of a portion or all of the Work, pursuant to

section XVIII (Reservation of Rights), the Work Defendants would

provided for atipulated penalties pursuant to this Section. As

provided for in Persgraphs A and B of Section XIX (Reimbursement

performs all or portions of the Work because of the Work

performs all or portions of the Work because of the Work

befendants' failure to comply with their obligations under this

becree, the Work Defendants shall reimburse the EPA or the State

for the costs of doing such work within thirty (30) days of

receipt of demand for payment of such costs, plus penalties,

pursuant to Persgraphs C or D of this Section, as applicable.

PARTIAL CONSENT DECREE

- 1 6. The Work Defendants are jointly and severally liable for any elipulated penalties pursuant to the provisions of this Section provided, however, that the total amount due and payable for each day of each violation shall not exceed those limits specified in this Section.
- 7 7. Work Defendants may invoke the dispute resolution procedures set forth in Section XXIV (Dispute Resolution) in any case that results in stipulated penalties based on a 10 determination of inadequacy including any determination of inadequacy by EPA pursuant to Paragraph D of Section XVIII (Reservation of Rights). Invoking the dispute resolution process shall not toll or suspend the accrual of stipulated penalties, subject to the provisions of Section XXIV (Dispute Resolution). 14 15

B. Monthly Progress Reports

2

16

17

18

1. The Work Defendants shall provide written monthly progress reports to EPA as described in Appendix C. These monthly progress reports shall describe all actions taken to comply with this Decree during this reporting period, including a general description of Mork commenced or completed during the 22 reporting period, Work projected to be commenced or completed 23 during the next reporting period, any problems that have been incountered or are anticipated by the Work Defendants in commencing or completing the Work, and shall also include the 26 monthly statements for the Escrow Accounts as described in 27 Paragraph P of Section X (Escrow Account). These monthly

- progress reports shall be submitted to EPA by the
- fourteenth (14th) day of each month, and should cover the work
- done the preceding calendar month and planned for the current
- calendar month.

5

10

11

15

16

17

- 2. If a submitted monthly progress report is inadequate, or if the Work Defendants fail to submit any monthly progress report in accordance with the schedule set forth above, then the Work Defendants shall be considered to be in violation of this Decree and subject to stipulated penalties as governed by this Section.
- 12 3. The Work Defendants shall pay stipulated penalties of 13 \$1,000 per day for the submission of inadequate or late monthly progress reports as called for in this Section. 14

C. Work to be Performed and All Other Deliverables

18 1. Any reports, plans, specifications (including discharge or emission limits), schedules, appendices, and attachments required by this Decree are, upon approval by EPA, incorporated 20 21 into this Decree. Any noncompliance with such EPA approved 22 reports, plans, specifications (including discharge or emission limits), schedules, appendices, and attachments shall be considered a failure to comply with this Decree and subject to 24 25 stipulated penalties as governed by this Section. In the event 26 Work Defendants exceed discharge or emission limits, stipulated 27 penalties shall apply under this Section. EPA may, however, in its sole discretion, determine it is appropriate to forgive or

```
-125-
```

reduce stipulated penalties assessed by EPA under this Decree
solely for such exceedences. If Work Defendents pay penalties
accessed by a state or local agency for such an exceedance, the
execunt of such penalties paid will be credited toward any
penalties assessed by EPA for the same instance of exceedance.

٦. 2. If EPA disapproves any Work, plans, reports (other than month)v progress reports, which are govered by Paragraph B above), or other items required to be submitted to EPA for approval pursuant to Section IX (Work to be Performed). 11 Section XII (Quality Assurance/Quality Control), or Section X (Factor Account), the Work Defendants shall have ten 10 days from the receipt of such disapproval to correct any inadequacies and 11 resubsit the plan, report, or item for EPA approval unless a lower period of time is provided by Subparagraph A(12) of 15 Section IX (Nork to be Performed) with respect to Work. This 17 Subparagraph C(2) does not apply to Project Proposals, as described in Appendix C. 18

3. Any disapprovals by EPA shall include an explanation of
 why the Work, plan, report, or item is being disapproved.

4. The Work Defendants must address each of EPA's comments
and resubmit to EPA the previously disapproved plan, report, or
item with any required changes within the deadline set forth
berein.

///

20 ///

19

1	If any plan, report, or item is inadequate after
2	resubmission, then the Work Defendants shall be deemed to be in
3	violation of this Decree and subject to stipulated penalties as
4	governed by this Section.
5	
6	6. Except for the stipulated penalties specified in
7	Paragraph B, above, the Work Defendants shall pay the following
	stipulated penalties for each failure to comply with the

d. All deliverables and Mork not identified in Paragraph B or Subparagraph (6)(a) through (6)(c) of this Paragraph C shall be Class II Requirements.

D. Stipulated Penalties for Special Circumstances

1. If EPA determines that Work Defendants have suspended performance of all or a portion of the Work, unless otherwise sllowed by the terms of this Decree, they shall be deemed to be in violation of this Decree and shall pay a stipulated penalty of \$3,000,000, in lieu of other stipulated penalties for that specific violation.

2. In the event that EPA determines that Work Defendants have failed to perform any material portion of the Work or have performed any portion of the Work in a substantially inadequate or substantially untimely manner, or in the event of an imminent and substantial endangerment to public health or velfare or the environment resulting from the performance of, or failure to perform, Work by Work Defendants, Nork Defendants shell pay a

stipulated penalty of \$1,000,000, in lieu of other stipulated penalties for that specific violation.

3. The costs incurred by EPA resulting from an EPA determination under Subparagraphs 1 and 2 of this Paragraph D shall not be allocable against the funding limitations of Paragraph C of Section IX (Nork to be Performed), as provided in Paragraph B of Section XIX (Reimbursement of Puture Response and Oversight Costs).

E. Stipulated Penalties for Cash Defendants

Each Cash Defendant's obligation for payment of stipulated penalties shall be limited to its obligation to make payments pursuant to Section VIII (Payments by Cash Defendants), Section X (Escrow Account) and Attachment A to this Decree. The amount of the penalties for any untimely payment or payment of less than the full amount due under this Decree shall be \$25,000 per day. Payments shall be made in accordance with Paragraph A of this Section.

XXIII. PORCE MAJEURE

For purposes of this Decree, <u>force maisure</u> is defined as any event arising from causes beyond the control of the Work

Defendants, or their contractors, subcontractors or consultants which delays or prevents the performance of any obligation under this Decree, and could not have been overcome or prevented by the

•

~ 24

Work Defendants' due diligence efforts. The Work Defendants
 shell have the burden of proving that the delay was caused by
 circumstances beyond the control of the Work Defendants.

4

5 When circumstances are occurring or have occurred that delay 6 or may delay the completion of any phase of the Work, and the 7 Work Defendants wish to invoke the provisions of this Section. the Work Defendants shall, as soon as possible, notify EPA's Project Coordinator orally and shell, within seven (7) calendar days of oral notification to EPA, notify the EPA and the State 11 Project Coordinators in writing of the anticipated length and cause of the delay, and to the extent possible, the following: which of the tasks are directly affected by the delay; the 1) seesures taken and/or to be taken to prevent or minimize the 14 delay; and the timetable by which the Work Defendants intend to implement these measures. Failure of the Work Defendants to 17 comply with the notice requirements of this Section shall 18 constitute a waiver of that claim of force majeure.

19 20

22

23

24

26

force mainure shall not include increased costs or expenses of any of the Work to be performed under this Decree, nor the financial inability of any of the Work Defendants to perform such Work, nor the failure of Work Defendants to make timely application for any required permits or approvals, and to provide all information required therefor in a timely manner. The EPA shall determine whether the event constitutes force mainure.

27 ///

PARTIAL CONSENT DECREE

44

1 If EPA determines that the event did not constitute fQIGS
2 majeurs, and the delay was not beyond the control of the Work
3 Defendants, this delay shall constitute non-compliance with the
4 Decree, and penalties shall accrue from the time of
5 noncompliance. If the EPA determines the event does constitute
6 force majeurs, it shall, in consultation with the Work
7 Defendants, determine the appropriate modification to the
8 achedules in the Plans. No deadline shall be extended beyond
9 that period of time which is necessary to complete the activities
10 with the least amount of delay possible. The Work Defendants
11 shall adopt all practicable measures to avoid or minimize delay.

12

15

16

17

If the EPA and the Work Defendants cannot agree as to whether the reason for the delay was a <u>force majeurs</u> event, the determination of the EPA shall control. If the Work Defendants dispute this determination, the dispute shall be resolved by the procedures outlined in Section XXIV (Dispute Resolution) of this Decree.

16 19 20

The Cash Defendants shall not invoke the provisions of this Section.

22

21

MXIV. DISPUTE RESOLUTION

24

26

27

As required by Section 121(e)(2) of CERCLA, the United States, EPA, the State and the Work Defendants shall attempt to resolve expeditiously and informally any disagreements arising

28 ///

PARTIAL CONSENT DECREE

6:

under or from the implementation of this Decree or any Work required hereunder.

3

If a dispute arises with respect to the meaning or application of this Decree, it shall in the first instance be the subject of informal good faith negotiations between EPA and the Work Defendants, pursuant to Paragraph B of this Section. The State may participate in these negotiations, consistent with the provisions of Paragraphs A and D of Section XXXIV (State and Local Agency Participation). In the event that the parties concerned cannot resolve any dispute arising under this Decree, then the interpretation advanced by EPA shall be considered binding unless the Work Defendants invoke the dispute resolution provisions of this Section. The Work Defendants' decision to invoke dispute resolution shall not constitute a force majoure under Section XXIII (force Majoure), herein. The Work Defendants reserve the right to dispute a determination regarding whether a force majoure has occurred.

19 20

1)

14

16

17

A. Notice

21

26

27

If the Work Defendants raise a good faith objection to any EPA notice of disapproval, determination of inadequacy, or other decision made pursuant to this Decree, or if the Work Defendants conclude that EPA and the Work Defendants have otherwise reached an impasse with repart to the requirements of this Decree, the Work Defendants shall orally notify EPA immediately of their objections. The Work Defendants shall subsequently provide

written notice to ZPA and the State within seven (7) celendar days of oral notification.

3

B. Informal Resolution Mechanism

5

EPA and the Work Defendants shall then have fourteen (14) 7 additional calendar days from the receipt by either party of the written notification to reach agreement. DMS may participate in these negotiations, consistent with the provisions of Paragraphs A and D of Section XXXIV (State and Local Agency Participation). If possible, such disputes shall be resolved by informal 12 telephone conferences. Any Party may also request that the Parties confer to resolve the dispute through an informal 13 14 conference, to be held within this fourteen (14) calendar day period. As appropriate, and upon agreement of the EPA, the State 15 and the Work Defendants, they may use independent technical 17 experts to assist in the resolution of solely technical disputes, provided however that there is no written finding or 18 determination made by such technical expert. We product or recommendation resulting from this consultation shall be offered 20 in evidence for any purpose in any proceeding. The Work 22 Defendants agree to pay for such independent experts and any such

24 25 26

23

At the end of this fourteen (14) calendar day period, or within seven (7) calendar days after an informal conference is held, whichever is later, EPA shall provide the Work Defendants

costs shall be excluded from the limitations on expenditures set

forth in Paragraph C of Section IX (Work to be Performed).

Superfund Enforcement Branch Chief, or his/her designes other

1 than the Project Coordinator, and the Work Defendants shall

4 implement the directives contained in such decision, subject to

5 the provisions of Paragraph C of this Section. If the Work

6 Defendants refuse to implement such directives, EPA or the State

7 may elect to perform such vork, pursuant to Section XVIII

8 (Reservation of Rights), infrs. If Paragraph C of this Section

9 is invoked, Plaintiffs may also elect to Peregraphs A or B of

10 required by the disputed directive, as provided in Section XVIII

11 (Reservation of Rights), and subject to Peregraphs A or B of

12 votion XIX (Reimbursement of Puture Response and Oversight

13 Costs) and Section XXII (Stipulated Penalties).

demand payment of penalties accrued until completion of the

dispute resolution process.

C. Judicial Resolution

In the event that the dispute cannot be resolved by the informal negotiation procedures sutlined in Paragraphs A and B above, and should the Work Defendants choose not to follow the EPA position, the Work Defendants may file with the Court a petition which shall describe the nature of the dispute and include a proposal for its resolution. Work Defendants may not file such a patition until informal negotiations pursuant to Paragraph B, mupga, are completed. The filling of a petition king the Court to resolve a dispute shall not of itself extend or postpone the Work Defendants' obligations under this Decree with respect to the disputed issue, or stay the provisions of section XXII (Stigmlated Penalties), except that the EPA vill not

XXVIII.	DEFENDANTS!	RIGHT OF	CONTRIBUT	ION AND
INDEM	TY AND COVE	ANT NOT TO	BUZ ZACH	OTHER

A. Each Defendant shall retain all rights under statutory or compon law to seek contribution or indemnification against any and all other persons or entities not party to this Decree.

3. Except as provided in this Paragraph, to the extent that any Defendant has complied with its obligations hereunder, and, as among the Work Defendants only, with its obligations under any separate agreement allocating the costs hereof, no rights as to matters addressed in this Decree are retained against such Defendant by any other Defendant and such rights are hereby expressly vaived, released and discharged with regard to such Defendant. Each Cash Defendant specifically retains any and all rights to seek indesnification from the Work Defendants as provided in Paragraph B of Section XXXVI (Indemnification).

C. For and in consideration of the sutual covenants and promises of the Defendants made herein and, as to the Work Defendants only, in any separate agreement ellocating the costs hereof, each Defendant hereby covenants not to sue or otherwise assert any claim against any other Defendant for reimburgement of any payment made pursuant to this Decree, except to enforce any allocation of costs made pursuant to such separate agreement. 111 111 111

2 Pursuant to Sections 113(f)(2) and 122(h)(4) of CERCLA and other applicable federal and state law, Defendants shall not be liable to other persons or entities for contribution claims regarding Covered Matters. Nothing in this Section shall constitute or be construed as releasing or providing any Covenent Not to Sue or Contribution Protection with respect to Covered Natters to any person not a Defendant or to any Defendant which 10 has defaulted on its obligations under this Decree. The United States and the State expressly reserve the right to bring any 12 appropriate action against persons and entities not signatories 13 hereto to recover response costs incurred by the United States and the State. 14 15 Each Cash Defendant's right to Contribution Protection under this Section shall remain in effect against all other persons provided it has not defaulted on any obligation under this Decree, whether or not any other Defendant has fully performed its obligations under this Decree. Each Work Defendant's right

XXX. CUVENANT NOT TO BUE

2

A. Except as provided in Paragraph C, upon the approval by 3 ZFA of the final Work Completion Report and certification of completion of the Work, including operations, maintenance and monitoring, the United States, EPA, the State, the California Herardous Substance Account, and the Attorney General of California (with respect to the authority under California Government Code \$5 12600 - 12612) ogvenant not to sue the Work 10 Defendants with regard to the Covered Natters which are performed satisfactorily by Work Defendants. "Covered Matters" shall mean those conditions which the alternatives selected in the RODs 1) (attached as Appendices A and B) are designed to remedy, the Work 14 implemented under Section IX (Work to be Performed), oversight costs associated with the performance of that Work and for all past response costs, including interest accrued thereon, incurred by the United States, the State and the California Hazardous 17 Substance Account up to June 1, 1988. Covered Natters 18 19 specifically do not include removals, remedial actions which will 20 be implemented pursuant to the final remedy, the gas control and 31 any future operable unit(s), or any environmental condition which 22 is identified in the RI/FS (except to the extent those removals, remedial actions, or those environmental conditions are already covered by Appendices A or B or the Work). The Parties also agree that remedial actions for groundwater contamination, if 26 any, are not Covered Natters under this Decree. This Section is 27 not, and shall not be construed as, a Covenant Not to Sue any Work Defendant that does not fulfill its obligations arising out

of this Decree, or any other person or entity not a Perty to this
Decree. Under the provisions of Section IV (Sinding Effect).

Mork Defendants shall be jointly and severally responsible for the performance of the Work Defendants' obligations outlined in this Decree; provided however, that their rights to a Covenant Not to Sue under this Decree shall not be affected by the performance or nonperformance of any obligation by any Cash Defendant under this Decree.

•

10 B. Except as provided in Paragraph C, upon receipt of all 11 payments required of each Cash Defendant under this Decree, the United States, the State, the California Hazardous Substance Account, and the Attorney General of California (with respect to 13 the authority under California Government Code §§ 12600 - 12612) 15 covenant not to sue that Cash Defendant for Covered Matters. Any Cash Defendant can obtain the full benefit of this Covenant Not to Sue by prepayment, at any time, of the balance of the total 17 amount due under Attachment A, Schedule 3. This Covenant Not to Sue shall remain in effect with respect to any Cash Defendant whether or not any other Defendant fulfills its obligations under 21 this Decree.

22

C. Defendants are expressly not released from, and the
provisions of Paragraphs A and B of this Section shall not apply
to, any matter which is not a Covered Matter, including the
following claims:

27 ///

28 ///

1.	Any	claim	based	on a	failure	of	any	Defendant	to	meet
ite obli	gati	one unc	ler th	le De	cree ;					

- 2. Any other claims of the United States, the State, or the California Nazardous Substance Account for any other costs or actions necessary at the OII Site which are not covered pursuant to the terms of this Decree;
- 3. Claims based on the Defendants' liability arising from the past, present, or future disposal of hazardous substances not associated with the OII Site at other disposal sites;
- 4. Any liability of Work Defendants for damage to federal or state property located any place that the Work is being performed;
- 5. Claims based on criminal liability;
- 6. Claims based on liability for damage to natural
 resources as defined in CERCLA;
 - 7. Claims based on liability for future monitoring or oversight expenses incurred by the United States or the State except as those expenses are Covered Natters; or
- 9. Liability on the part of the Work Defendants for any violations of federal or state law which arises from inplementation of the Work.

- D. The Defendants hereby release and covenant not to sue the United States, including any and all departments, agencies. officers, administrators, and representatives thereof, for any claim, counter-claim, or cross-claim asserted, or that could have been asserted prior to the effective date of this Decree arising out of or relating to the OII Site, except for any liability arising under Sections 107 or 113 of CERCLA relating to the OII Site for any federal entity that has not resolved its liability for Covered Matters under the provisions of this Decree or its equivalent. Defendants also release and covenant not to sue the 10 State, including any and all officers, administrators, and representatives thereof, for any claim, counter-claim, or 12 13 cross-claim asserted, or that could have been asserted prior to 14 the effective date of this Decree arising out of or relating to 15 the OII Site. 16
 - E. Nothing in this Decree shall constitute or be construed as a release or a covenant not to sue regarding any claim or cause of action against any person, as defined in Section 101(21) of CERCLA or California Neelth and Sefety Code, § 25319, or other entity, not a signatory to this Decree for any liability it may have arising out of or relating to the Site.
 - F. The Parties to this Decree agree that while the United States, EPA and the State may support the applicability of Section XXIX (Contribution Protection) based upon the existence of this Decree, neither the United States, nor EPA nor the State shall be under any obligation to assist the Defendants in any way

28 ///

XXXIV. STATE AND LOCAL AGENCY PARTICIPATION

A. Lead Agency

.

EPA is and shall be the lead agency, as defined in the MCP, for the activities within the scope of this Decree.

B. Interegency Committee

- 10

The Operating Industries Interagency Committee ("IAC") consists of interested state and local agencies. The IAC meets on a regular basis to exchange information on agency regulatory activities at the OII Site and reviews and comments on remedial and response actions undertaken at the Site. The IAC has a T-chnical Subcommittee ("IAC Technical Subcommittee") which exchanges technical information and which is primarily responsible for reviewing and commenting on the remedial and r-sponse actions.

C. Bole of Intersgency Committee

The Work Defendants shall make available copies of significant deliverables in this Decree, such as Plans, Designs and the Operations Nanual, to the members of the IAC for review.

EPA will provide Work Defendants with a current mailing list for IAC members prior to the effective date of this Decree. After the IAC Technical Subcommittee and any other interested IAC members have hed the opportunity to review the deliverables, they

1	shall have the opportunity to meet with EPA and the State to
2	discuss the deliverables and prepare collaborative comments.
3	These collaborative comments shall be submitted to the Work
4	Defendants as EPA comments. The Work Defendants shall respond to
5	the EPA comments as may be required by the terms of Section IX
6	(Mork to be Performed) and subject to Work Defendants right under
7	Section XXIV (Dispute Resolution).

•

significant deliverables required to be submitted by the Work
Defendants under this Decree. EPA will also consult with the
State before determining whether a <u>force maisure</u> event beyond the
control of the Work Defendants has occurred, and whether the Work
Defendants have substantially complied with or completed the
terms of this Decree. EPA's failure to consult with the State
will not relieve the Work Defendants of any obligation to comply
with the requirements of this Decree. If it is not practicable
for EPA to consult with the State, EPA shall notify the State of
its approval or determination as soon as possible. The State's
failure to object in a timely menner to an approval,
determination, or other decision of EPA made under this Decree
shall constitute concurrence with EPA.

XXXV. CONSISTENCY WITH THE NCP

The United States, the State and the Defendants agree that the Mork, if performed in accordance with the requirements of this Decree, is consistent with the provisions of the National

611 and Mazardous Substances Pollution Contingency Plan, 40 C.F.R. Part 300, pursuant to Section 105 of CERCLA 42 U.S.C. 5 9605.

4

XXXVI. INDEMNIFICATION

6

7 A. The Work Defendants shall indeanify the United States with respect to EPA, USACE and the U.S. Coast Guard, and the State and save and hold the United States with respect to EPA. USACE and the U.S. Coast Guard, and the State, and any of their divisions, departments, agents and employees harmless for any and all claims or causes of action arising from any injuries or decayes to persons or property resulting from any negligent, 14 wanton or willful acts or osissions of the Work Defendants, or their successors, assigns, contractors, subcontractors, or any other person acting on their behalf in carrying out any 17 activities pursuant to the terms of this Decree. This indemnification does not extend to that portion of any such claim 19 or cause of action attributable to the negligent, wanton or villful acts or emissions of the United States with respect to 21 EPA, USACE, or the U.S. Coast Guard, or the State or their contractors, subcontractors or any other person acting on their 23 behalf in carrying out activities at the Site. The United States and the State shall notify Work Defendants of any such claims or actions within thirty (38) days of receiving notice that such a claim or action has been filed. The Work Defendants have the right to intervention under Section 113(i) of CERCLA, if 28 111

applicable, and to seek intervention under the provisions of P.R.Civ. P. 24 and California Code of Civil Procedure 6 387.

contract entered into by the Work Defendants at the Site.

Neither Plaintiffs nor Cash Defendants are parties to any

6

7 B. Work Defendants agree to indeanify and hold Cash Defendants and their directors, officers and employees harmless from damages or claims arising as a result of negligent 10 performance of the Work, or of negligent, villful, or wanton failure to perform the Work by the Work Defendants or their 11 12 contractors or subcontractors. This indeanity and hold heraless 1) as to Cash Defendants shall not apply to any Cash Defendant which is not in compliance with the terms of this Decree. Furthermore, this indemnity and hold harmless shall not include any damages or 15 claims arising as a result of any negligent, willful or wanton act or omission of any Cash Defendant or its directors, officers 17 or employees, nor shall it include any damages or claims which arise or result from conditions at the Site which are not the 19 result of the Work performed under this Decree by the Work 21 Defendants or their contractors or subcontractors. Without 22 limiting the foregoing, the Work Defendants' obligation as to the Cash Defendants shall not apply to any claim or cause of action 23 arising prior to the effective date of this Decree or to the extent of any liability attributable to any third party, 25 including EPA, the State or any Cosh Defendant. Any Cosh 27 Defendant shall notify Work Defendants of any such claim or

action within thirty (30) days of receiving notice that such a

1
~

w
',

1	claim or action has been filed. Work Defendants shall have the
2	right to join in the defense of all claims or causes of action
3	within the scope of this indemnification. Purther, unless Work
4	Defendants refuse to join in the defense as herein provided, Cash
5	Defendants shall not take or fail to take any action which would
6	prejudice Work Defendants' rights, privileges, defenses, or
,7	cisins, and shall not settle any claim or cause of action within
•	the scope of this indemnification without the consent of the Work
•	Defendants. Mothing in this Paragraph B shall be construed to
,0	effect or pertain to the indemnification of the United States or
11	State, as set forth in Paragraph A of this Section.

XXXVII. CLAIMS AGAINST THE FUND

Bothing in this Decree shall be decred to constitute a presuthorization of a CERCLA claim within the meaning of Sections 111 or 112 of CERCLA or 40 C.F.R. § 300.25(d). In consideration of the entry of this Decree, Defendants agree not to make any claims pursuant to Section 112 or Section 106(b)(2), 42 U.S.C. §§ 9612, 9606(b)(2), or any other provision of law directly or indirectly against the Mazardous Substance Superfund, or make other claims against the United States or the State for those costs expended in connection with this Decree.

EXECUTION CONTINUING JURISDICTION

The Court specifically retains jurisdiction over both the subject matter of and the Parties to this action for the duration

of this Decree for the purposes of issuing such further orders or directions as may be necessary or appropriate to construe, implement, modify, enforce or terminate the terms of this Decree or for any further relief as the interest of justice may require. XXXIX. REPRESENTATIVE AUTHORITY Each undersigned representative of the Parties to this Decree certifies that he or she is fully authorized by the Party to enter into and execute the terms and conditions of this 10 Decree, and to legally bind such Party to this Decree. 11 12 13 XL. EFFECTIVE DATE 14 This Decree is effective upon the date of its entry by the 15 16 Court. 17 MLI. TERMINATION AND SATISFACTION 18 19 Upon completion of the Work to be performed pursuant to this 20 Decree, or upon occurrence of an event terminating Work 21 Defendants' obligations, as described in Paragraph C of Section 22 IX (Mork to be Performed), Work Defendants shall submit to 23 24 Plaintiffs a written certification that the Work.has been

completed in accordance and in full compliance, or that they have

otherwise satisfied their obligations in accordance and in full

compliance, with this Decree. Within sixty (60) days of receipt

of such certification, EPA shall approve or disapprove the

140-

1	certification subject to the provisions of Paragraphs A and D of
2	
7	provisions of this Decree, including Work Defendants' obligations
4	for Covered Natters, other than Section XVII (Retention of
5	Records), shall be deemed satisfied upon the Work Defendants'
6	receipt of such written approval from EPA; provided that
7	termination of this Decree shall not alter the provisions of
1	Section XVIII (Reservation of Rights), Section XXIX (Contribution
•	Protection), Section XXX (Covenant Not to Sue) and such other
10	continuing rights and obligations of Mork Defendants under this
13	Decree,
12	
13	Upon full payment of all its obligations under Section VIII
4	(Payments by Cash Defendants), Section X (Escrow Account) and
5	Attachment A, each Cash Defendant shall have satisfied its
4	obligations for Covered Natters under this Decree, and this
7	Decree shall be terminated as to that Cash Defendant, provided
•	that the termination shall not alter the provisions of
•	Section XVIII (Reservation of Rights), Section XXIX (Contribution
0	Protection), Section XXX (Covenant Not to Sue) and such other
1	continuing rights and obligations of that Cash Defendant under
3	this Decree.

10 INTRODUCTION, INTENT AND OBJECTIVES

I INTRODUCTION

- Leachase Management System (LMS) activities to be undertaken by the Work Defendant, in This Scope of Work document summanzes the Site Control and Monitoring (SCA) and compliance with this Decree
- The Work shall be consistent with the decisions set forth in the Records of Decision (RODs) Performed) of this Decree. For purposes of this Scape of Work, the activities from the two presented in Appendices A and B and performed pursuant to Section LX (Work to be RODs are functionally divided into the following two areas:
- SCM includes coard, maintenance, mon improvements of the following elements
 - Gas Control.
 Storm Water/Eroscon Control.
 Landscaping/Imgauon.
 Access Roads.

- Fences. Support Facilities and Utilities
- LMS includes control, maintenance, mo improvements to the following functions
- Liquid Collection.

 Jennin Transport and Offsier Transeem and Dagosal.

 Prevenment and Transport Paping.

 Jedheers Storage and Liquid Treassen.

 Effluent Storage and Transport.
- Invisibly, the liquids shall be hauted office for promosa and disposal. A major, planned LNIS project will be to design and construct an onsite Desiment System to handle all or most of the

To tand

- The Scope of Work is presented in the following former
- The remainder of Ompret 1.0 discusses the inners and objectives for the SOM and LMS activities.
- rides a brief description of existing site facilities related to

 - Chapter 3.0 discusses areas where integration is required between SCM and LMS activities, and with other activities at the site.

En 1548 (0:57 PM)

- Chapters 50 and 60 provide the 50 M and LMS Scopes of Mont.
- Chapter 7 discusses the Peliminary and Proposed Scheduler and Proposed Budget for Work Defendants Proposed Scope of Work Chapter 8 0 describes deliverables which are required and principlins to
 - be followed for their review Chapter 9.0 discusses the achedule for initiation
- "minamase" certain undesimble factions (e.g., minimase the uncontrolled release of landfill gav. see. The terms manimum and maximum are uned in the context of the existing site conditions and to "maximuse" cortain desirable conducens (e.g., maximuse flare station efficiency at the The objectaves sessed in this chapter indicase that a prunary goal of the program shall be in and in the context of practical and feasible actions which can be undertaken as part of the focused SCM and LMS functions
- Remodual Action Guidance Documen (OSWER Duccove 9355 0-1A. dated June 1980), shall For activities set forth in this Scope of Worth, the EPA Superfund Remedial Design and be followed as appropriate.

1 2 INTENT

- SCM and LMS activities include certain upgrades which they believe will accelerate in yourse It is the Work Defendants' intentition in addition to control, maintenance and monitoring the environmental improvements for the sue. These are identified in Table 5.2
- gained by accomplishing the proposed improvements as early as possible. However, the EPA cannot initially commit to approve specific improvements until: (1) appropriate justification Excrew Account funds pursuant to Puragraph C of Section IX (Work to be Performed) and studies have been completed, and (2) there is assurance that basic SCM and LMS activities. The EPA generally agrees with the Wortt Defendants that there are benefits which may be during the unitial five year period will be adoptusedly accomplished with remaining "Work." Section X (Excrow Account) of the Devree. ~
- made, it is agrood that Project Proposals (Subchapter 8.2) for proposed improvements shall be submished as early as possible after the effective date. These Project Proposals will include In order to reflect the Work Defendants' intent and to allow improvement decisions to be cost-benefit data to allow the EPA and the Work Defendants to establish prnonties and m

Res 10.048 (2 16 PM)

each year will be determined as pain of each annual SCM/LMS Masker Plan revision schedules for completing all or a portion of the improvement activities. The actual work for (Subchapter 8.2)

SCM OBJECTIVES

- This section summarizes objectives for each SCM activity. The topics are discussed in the System Services
- Control
- Mausznancz Mosetoniag Improvements

(

activities, including improvements, is to approach or achieve these ARARs. The final remedy Requirements (ARARs) identified are not currently being met, and one objective of the SCM The ROD for SCM (Appendix B) states that Applicable or Relevant and Appropriate is intended to achieve these ARARs.

TONTROL

- Size control activities shall have the following functional objectives:
- Ges Chantel. Minimize the unconvolled release of headful gas from the site, and operate gas commot synems to prevent or minimize under ground first, to the extent possible given the existing or improved conditions. This shall be accomplished by establishing goals and taking appropriate
- Minimize surface gas emissions from the surface of the landfill.
 Minimize offsite gas migration through submarface goil.
 Minimize fibre station destructive removal officiancy.
 Minimize submarface fibre.
- Strongeneral Existing Council. Provide effective surface water drainage on the OII size, so that inflammen and erosion are controlled and minimized. This shall be accomplished by establishing goals and taking appropriate
- Minimist turfact waar infibration. Minimist tolifodiment transport off-size Minimist erosion.

(

- dy repair crosson consequences
- ining/impriss. Impre and maintain existing or improved site ion to minimize sheet crosson to the extent possible.
- R. INDUMPI
- 1

- roads, as appropriate Access Roads Provide all-weather access to critical parts of the site maintain critical flow lates and grading plant, and maintain other site
- Emang Maintain a permitter and interior fence which discourages unauthorized access to the sale and facilities
- Support Facilities and Utilities Provide support facilities and utilities to fulfill the control, maintenance and monitoring activities

1 3 2 SCM WASTES

SCM wastes generated shall be managed pursuant to Section IX (Work to be Performed) of

13.3 MAINTENANCE

. Site features, including appurenances, systems, support facilities, and related necessary offsite systems, facilities, or equipment shall be maintained to the extent required to fulfill the cantral objectives specified in Subchapter 1.3.1.

1.3.4 MONITORING

Monitoring of site features, including apparenances, systems, support facilities, and related conditions. Additional maniforing procedures or equipment may become necessary during tystem parameters, importions of site conditions, and auditing of the SCM activities the course of the SOM activities. Activities may include monitoring of control parameters or protectionical instruments shall be conducted as necessary to assist in decisions regarding control objectives specified in Subchapter 1.3.1. Also, monitoring of mesecrological and necessary off-site systems, facilities, or equipment shall be conducted as required to fulfill the ment actions and the design of improvements and to increase overall knowledge or site

-153-

1.3.5 DAPROVENENTS

- potential improvements shall be evaluated based on how well the improvement sausfies the following objectives: improvements are included within the overall scape of the SCM. Decisions regarding
- Enhance level of site control and/or monitoring Expand control for a wider range of conditions Correct control deficiencies.

Rev 8/10/88 (11.27 AM)

- Preclude control failures and site deterioration
- Minimuse human health hazards
- Provide an acceptable level of control at a reduced cost
- Approach or achieve compliance with Folleral, State, or local regulations, requirements, or formal policies
- Enhance the technical understanding of site conditions
- Avoid unnecessary conflicts with probable final remedy components

Because this Decree includes funding limitations pursuant to Section LX (Work to be Performed) of the Decree as described in Subchapter 1.2, specific improvements shall be approved only when it is determined that the cost of that improvement would not eliminate funds required for basic SCM and LMS activities. Subchapter 8.2 describes the information required when an improvement is proposed.

- 2 The program includes annual updates to the SCM/LMS Master Plan and Operation's Manual to reflect existing conditions and the actual work progress. Priorities for improvements shall be reevaluated each year and final decisions shall be made regarding improvement planning (or the coming year, as part of the SCMALMS Master Plan approval process.
- 3. It is anticipated that the majority of the Work Defendants' recommended improvements will be implemented during the first 3 years. This would allow the improvements to be completed as early as possible, but still allows for annual decisions to be made consistent with the available funds and the monitoring and maintenance history.

14 LEACHATE MANAGEMENT SYSTEM (LMS) OBJECTIVES

- 1. This section summarizes objectives for each LMS activity. The topics are discussed in the following sequence:
 - Liquid Collection.
 - Interim Transport and Offsite Treatment and Disposal

 - Preveatment and Transport Piping. Influent Storage and Liquid Treatment.
 - Effluent Storage and Transport.
 - Maintenance and Menitoring
 - Improvements.

14.1 LIQUID COLLECTION

- 1. Liquid control will unlaistize unigration of leachate from the site to the extent possible with existing leachate management systems. This shall be accomplished by:
 - Minimizing production of leachers
 - Minimizing leachess migration offsite.

Fer. \$5000 (2.16 PM)

-30-

- Maximusing leachage collection tysicm officiently
- Preventing maste and offsite leachare seeps
- Preventing onsite and offsite contaminated liquid spills

Other bound streams (e.g., condensate, decontamination waters) will be imministed without adversely affecting control objectives

1.4.2 INTERIM TRANSPORT AND OFFSITE TREATMENT AND DISPOSAL

- 1. Prior to operation of the onsite treatment plant, collected liquids shall be transported to an appropriate, EPA approved, offsite treatment facility. This shall be accomplished by
 - Providing adequate, temporary, onsite storage
 - Providing appropriate stacks to transport the liquid in the manner which minimizes the potential for spills
 - Contracting with an approved TSD facility

1.4.3 PRETREATMENT AND TRANSPORT PIPING

- 1. Liquids shall be prepared, combined, and transported from the point of origin to the treatment plant storage in the manner which minimizes the overall treatment requirements. This shall be accomplished by:
 - Avoiding the mixture of streams which can impair treatment
 - The imital removal of constituents by premeatment, if appropriate for maintaining treatment plant efficiency
 - Minimizing the potential for uncontrolled transport of liquids to the Leaching Treatment System (LTS) which could upset the system

1.4.4 INFLUENT STORAGE AND LIQUID TREATMENT

1. Combine and counties flows and operate the treatment plant so that the amount of liquids from the site are adequately arested, at the lowest cost

1.4.5 EFFLUENT STORAGE AND TRANSPORT

1. Provide sufficient storage to permit appropriate analyses to be performed prior to discharge to the Publicly Owned Treatment Works (POTW) and/or strigation system

1.4.6 OTHER LMS WASTES

1. Other LMS wastes generated will be managed pursuant to Section LX (Work to be Performed) of the Decree.

Rev. 8/9/88 (1 48 794)

-31-

7

- offsite systems, facilities, or equipment shall be maintained to the extent required to fulfill the Size features, including appurenances, systems, support facilities, and related necession control objectives specified in Subchapters 1.4.1 through 1.4.5
- become necessary during the course of the LMS activities. Activities may include monitoring overall knowledge of size conditions. Additional manifesting procedures or equipment into of control parameters or system parameters, and inspections of site conditions. decisions regarding maintenance actions and the design of improvements and to increase encharological and geomethescal instruments will be conducted, as necessary, to assist in control objectives specified in Subchapters 1.4.1 through 1.4.5. Also, monitoring of reacessary affiliate systems, facilities, or **equipment shall be** conducted as required to fulfill the Monitoring of site features, including appuraments, systems, support facilities, and related

148 DAPROVEMENTS

LMS improvements that he evaluated and accomplished pursuant to Subchapter 1.3.5 (SCA)

1 3 HEALTH AND SAFETY ORDECTIVES

All size activities shall be developed, planned, and implemented in a manner which is consistent with applicable occupational and public health and safety requirement, as specified in Section XI (Worker Health and Safety Plan) of the Dacree, and Chapter 4.0.

1 6 QUALITY OBJECTIVES

All six ectivities shall be developed, planted, and implemented in a manner which provides does of adequate and appropriate quality concerning system operation or site characteristics, as specified in Section XII (Quality Assurance/Quality Control) of the Decree, and Chapter 4.0.

1 7 MANAGEMENT PROBMATION SYSTEM (MIS)

Is the development and subction of the MJS and associated software, preference shall be given to systems which can be readily transferred to EPA.

E- 1748 (1 48 PM)

20 BACKGROUND

SITE HISTORY

2.1.1 LOCATION

The Off See is located at 900 Poercro Grande Drive in the City of Monterey Park. Los Angeles Freeway dividing the Site into a 45 acre northern parcel and a 145 acre southern parcel. The County, California. The Site encompasses approximately 190 acres, with the Portional majority of the onsite systems and facilities are located on the southern parcel

2.2 SYSTEM DESCRIPTION

- The description of existing site systems is provided in Eulabil 1 of this Scope of Work. The following systems and facilities are discussed
- 1.1 Active Control Systems
- 1.1.1 Gas Management
- 1.1.1 Interior Gas Extraction System
 1.1.1.2 Perimeter Gas Extraction System
 1.1.1.3 Air Dike System

- 1.2 Leachate Collection Systems
- 1.2: Area I Collection
 1.2: Area II Collection
 1.2: Area III Collection
 1.2: Area IV Collection
 1.2: Area IV Collection
 1.2: Area V Collection
- 1.2.6 Onsite Storage
- 1.3 Landscaping/Integration 1.3.1 Oll System .
 1.3.2 Toe Business and Nurshwest Slope System
- 1.4 Passive Control System
- 1.4.1 Startments/Erosion Congol
 1.4.2 Site Access and Security
- I.4.2.1 Access Roads
 I.4.2.2 Perimeter Fencing
 I.4.2.3 Gane Security Office
 I.4.2.4 Security Lighting
 I.4.2.5 Utilities and Support Facilities
 I.4.2.6 Engrance Gate

NOTINGODUCTION

1. This chapter describes how certain Work Defendant and EPA activities at the suc shall be coordinated. These activities include

Leachure management and recomment plant design Site control and monitoring. Landfull grace control, including the gas control operable unit Remodul sines against

Emergency response activities

critical to untegration of the various activities discussed below. The following suitchapters 2. Communication between the organizations performing or approving the above activities to describe the activities, the organizations, and the sericiare for communication

3.2 SITE ACTIVITIES REQUIRING INTEGRATION

)

1. Examples of activities potentially requiring integration include:

SCM activities which could modely the liquid quantities or qualities (e.g., equipment washdown water, modelications to piping system), or stronge which will have a direct and immediate impact on the LMS. Conversely, quality or quantity limitations of the LMS may place constraints on the activities.

Hydrogeologic drilling and exaing activities can generate waters which may require treatment. Temporary storage may be required to determine if transmitted or determine if the second those liquids is required, and if so, procedures for blending the fluids into the treatment system flow will have to be determined by the plant operation. Periods of blending may require the temporary reduction of leachest collection or hydrogeologic testing activities.

Relevan das and experience gained from the SCM and LMS operation must be integrated into the final festibility study for the stee.

Activities associated with lendfull gas control activities will continue to generate condensate which should be incorporated and the LMS influent stream. Therefore, any significant changes in the gas collection program must be coordinated with the design and operation of the LMS and appropriate SCM activities.

To the maximum extent feesible, existing flare stations may be used to incinerate LMS off-gas.

The use of treatment plant effluent for the strigation system.

Impainon activities currently conducted by Operating Industries, Inc.

I.s. shed (rests AM)

)

I As described in the Decree, the Work Defendants. EPA, and DHS shall each designate a Project Coordinator as the focal point for formal communications. In addition, the following communications procedures shall be used to assure integration of site activities.

Periodic technical exchange meetings

Mutual review process for proposed activity changes

 Nonfication procedures for any onsite activities or events, including spills or upsets, which may affect the Work.

- 2 Periodic technical exchange meetings shall be conducted between Work Defendants and EPA (and others, as appropriate,) working at the site. Discussion topics may include their current activities and forthcoming plans regarding activities that could have impacts on other entities performing work at the site.
- 3 To assist in the approval of project deliverables and to assure integration of site activities, the periodic technical exchange meetings shall be a forum allowing the participants to present status reports and interim conclusions and to receive communits, thus building a technical consensus early on. This may include exchange of data and reports.
- 4 The periodic sechaical exchange meeting participants shall agree on notification procedures for upsets or short term instances which may have an effect on each other's activities. As appropriate, these procedures shall be integrated with overall size emergency procedures.
- 5 Sometimes it shall be necessary to include other organizations, including state or local agencies, at a technical exchange investing. Invitations to attend shall be coordinated through the Project Coordinators.
- Pursuant to the applicable health and safety plans, tours of the site by interested agency.
 industrial, or public groups shall be arranged through the Project Coordinators.

4.0 SCOPE OF WORK FOR PRETRANSITION AND TRANSITION ACTIVITIES

 This chapter presents the Scope of Work for the following activities which are common toboth the SCM and LMS programs.

Task T I - Transition Plan

Task T.2 - Interior Budget and Operations Plan

Task T.3 - Safety, Health and Emergency Response Plan

Task T 4 · Quality Assurance/Quality Control (QA/QC) Plan

. Task T.S. Transition Activities

Task T 6 - Project Proposal Plan

Task T.7 - SCM/LMS Master Plan

Task T.8 - Operations Manual.

- The Transition Plan must be approved before the transition period begins. Tasks T 2 to T 4
 must be completed before the Work Defendants assume field responsibilities. Tasks T 6 to
 T.8 shall be completed according to the schedule set forth in Chapter 9.0.
- The preliminary and detailed budget estimates shall be developed on the basis or standard
 engineering cost estimating practices. For the purposes of this Scope of Work, the
 preliminary and detailed budget estimates shall have goals of ± 25 and ±15 percent,
 respectively, of actual costs.
- Task T.1 Transition Plan This plan shall specify the procedures and required activities for the Work Defendants to begin formal field transition activities with EPA. The plan shall include at least the following elements:

 Onsie Facilities Plan, including locations, utility hook-ups and procedures for integrating with existing facilities.

Personnel and facilities mobilization logistics and schedule.

 Training of the Work Defendants' contractor by the EPA contractor as needed for the transition.

Staffing approach and breakdown by discipline and organizational responsibility matrix.

Reduced personnel plan for a period exceeding & weeks, if appropriate

During the transition period, the EPA's Contractor shall maintain responsibility for field activities. Work Defendants shall comply with applicable existing health and safety plans

. .

LMS activities until the SCH/LMS Master Plan and Operations Manual are approved. The Task T.2 - Inscrim Budget and Operations Plan - This plan shall be used for both SCA1 and plan shall include at least the following elements

...

- A statement of the control, maintenance and monitoring activities to be undertaken at the site, including schodules for each.

 Specific reference to portions of the EPA Operations Manual (custing at
- that terms) which will be used
- An uniorum Monthly Progress Report formai
- and oresing of leachage Subcommeter Transison Plan, including procedures for offsite hauling
- Management Information Systems (MIS) description and demonstration
- An implementation procedure for beginning the MIS program
 A budget for a 6 month period, including a reasonable contingency for
- An lacideal Report format. PROPERTY OF THE PROPERTY OF TH
- fer the transition period inscation procedures for rousine and emergency issues which anse
- shall be developed pursuant to Section XI (Worker Health and Safety Plan) of the Decree Ink I.3 - Safety, thealth and Emetyency Response Plag - This plan shall guide health, safety As required to suit specific activities, addenda to the general plan shall be provided. The plan and emergency response procedures for all activities to be conducted by the Work Defendant

The general plan shall include at least the following basic elements

- roduction and Purpose.
- pplicable Laws and Regulations.
 Inside Organization and Coordination
 Indical Serveillance Program.

- Chemicals of Concern.
 Activities Hazard Analysis.
 Site Comrod, Work Zones, and Security Measures. eral Safe Work Practices.
- name Work Plans d Promotive Equipmen
- ed Operating Safety Procedures.
- og Plan (Personnel and Environment) manaion Procedures

- pency Response Flux, including
- A Consequery Plan.

 Memification and responsibilities of an Emergency Coordinator liberations for updating and distributing the Plan.
- ard Korping. serements for Subcontractor and Special Activity Plans

Pro Prison (11:32 AM)

-36-

EPA's comments on and approval of this Plan shall not constitute I P's approval of the first and Safety Protocols and other health and safety purbons of this Flan

- such as for the LMS activities and shall be developed pursuant to Section XII (Quality QAQC Plan and specific sampling plans shall be prepared as required for specific acumues. Task T.4 - Quality Assurance(Quality Control (QA/QC) Plan - This plan will good quality Assurance/Quality Control) of the Decree. The Plan shall include at least the following basis procedures for all activities to be conducted by the Work Defendants. Addenda to the general
- Project organization and qualifications of staff
- Sampling and sample custody procedures, including the sample site selection rationale.
- Analytical methods/procedures
- Analytical/substitut/control procedures, including requirements for accuracy, sensitivity, precision, sample quantities, calibration procedures, preventative maintenance, internal quality control checks, representative samples and data comparability.
- Data handling, analysis and reporting
- Special testing
- Alternative was procedures
- Deta validacion procedures
- Requirements for subcontractor and special activity plans
- Task T.S. Transition Activities The procedures and activities during the transition period shall occur in accordance with the Transison Plan

-.158 -

- Task T.6 Project Proposal Plag This plan shall be prepared to determine, as early as possible, the schedule for preparing Project Proposals for improvenents which may be half he subdivided into the following three categories: Plan. To facilitate achorboling and budgeting in the Master Plan, the potential improvements sphemensed. Curtain of the proposals shall be required as input to the SCM/LMS Master
- Category I Improvements which have the potential to significantly affect decisions regarding first year activities, and therefore which should be decided upon before the SCN/LMS Master Plan is finalized.
- Category II Improvements which could have importance to the configuration of a Category I item. The Project Proposal for Category II items should be completed prior to finalization of the Master Plan so that

Rev Willes (11.3) AM)

Caregory III - Improvements which can be identified as being misentially important, but which do not appear to have significant impact on the first years SCM/LMS activines.

The Project Proposal Plan shall include at least the following elements

- Identification of and description of potential unprovements being considered, and an unual his of ahernatives being considered for each
- An evaluation of the importance of each potential improvement for the first year's SCM/LMS activities and to each of the other potential
- Conceptual schedules and budgets (±40%) for completing the range of alternatives under consideration for each potential improvement
- Assignment of each potential improvement to Category I, II and III status
- A detailed schedule and cost estimate for completing Project Proposals for each Category I and II item, and preluminary achedules and cost estimates for completing each Category III Hem.
- 10 Task T.7 SCMAMS Master Plan This Musier Plan shall be the main document for controlling and guiding SCM and LMS activities for implementation of this Decree by the Work Defendants. It shall state the basic SCM and LMS activities which must be accomplished and shall include a procedure to prioritize proposed improvements. The Muster Plan shall be detailed for the uncoming year's activities and preliminary for later years Subchapter 8.2 discusses procedures to formally revise the Master Plan annually so that each year's detailed planning reflects the most current site conditions. The Master Plan shall wellede at least the following elements:
 - A statement of the intent and objectives of the SCM and LMS activities.
 - Detailed schedule and description of necessary and nountial SCM and LMS activities for the uncoming year period.
 - Preliminary schedule for the remaining years of control, maintenance. monitoring and improvement activities.
 - General descriptions and priority designations for potential improvements in the preliminary schedule and discussion of their possible budget
 - Preliminary budget and cash flow projections for all items on the preliminary schedule.
 - Detailed budget for necessary and potential opcoming year activities. The budget shall include detailed summanes of labor, equipment, material and

Br. 87/8 (2.39 PM)

- Yo -

- subcontractor requirements for each activity, an estimate of their anacipated costs, and an estimate of contingencies for unanity spated
- The schedule for completing all or portions of potential improvement designs during the upcoming year, in order to provide engineering estimates and schedules needed for establishing phompes
- 11. Task T.A.: Operations Manual The Operations Manual shall be prepared in coordination with the Master Plan to assure compaubility between the plans and day-to-day field activities However, the Operations Manual shall be a complete, "stand alone" document to provide controls and guidance for the various site activities. The Operations Manual shall include the following stems:
 - Description of SCM related systems
 - Operational procedures
 - Operational emergency response
 - Maintenance procedures.
 - Maintenance schedules
 - Monitoring procedures.
 - Monitoring schedules.
 - Strategies for special activities (such as erosion control on steep slopes)
 - Program interaction/integration requirements
 - Parts and equipment inventory.
 - Appendices with:
 - Approval procedures for budgetary variance and emprovement prioritization.

 Sampling Plans for each of the monitoring activities

 - Incident report format
 - Improvement and change order prioritization and approval procedures.
 - Subcontractor and vendor control procedures
 - MIS User's Manual.
 - Monthly report format (see Subchapter 8.3.1).

During LTS design (Subchapter 6.4.2), an Operations and Startup Section specifically for that facility shall be developed. The Section shall be prepared to fit directly into the SCM/LMS Operations Manual.

- 12. The Appendix to the Operations Manual which describes the approval procedure for budgetain modifications shall consist of a management plan, which shall include at least the following elements:
 - Definition of Work Breakdown Structure with pered levels of responsibility, and work element budgets and milestones.
 - Definition of the level of budgetary authority. The authority of approval on budgetary increases which shall be established in this Appendix, shall

Ecv. \$566 (2.39 PM)

reflect the degree of management toquard. For example, the Work Defendants Project Coordinator could approve variances within his/he, level of authority without sectuals an approval from a higher level.

- Defination of the procedure to report and request approval for potential vanances beyond the approved level of authority.
- Budget variance approval request procedures which as the minimum shall include

- Nature and extent of the potential variance.
 Potential impacts on overall goals of the Scope of Work.
 Alternatives for misgation of the variance.
 Recommended actions, including requested approval of variance. If appropriate.
- Speculications of the magnitude of variances to be reported in the month) report and a definition of the reporting format.
- 13 Each Sampling Plan appendix shall include as least the following items
- Sampling rationale and desemption of techniques used in selecting sampling sites (e.g., random, samified).
- Specific sampling, preservation, and preparation procedures used, exerction methods, analysical references or descriptions (including sample tize, types of sample containers, applicable samplers, esc.). For nonstanded or medified sampling methods, detailed procedures with appropriate references are required.

)

- Sampling program organization, if needed.
- Description of sample consiner and sampler cleaning procedures for each type of consision to be used following EPA guidelines or other appropriat Procedures.
- Procedures to avoid sample consenieston.
- Sample preservation methods and holding times, following EPA SW-846 puidelines or other appropriate references.
 - Somple transportation requirements (following EPA and Department of (ransportation guidelines, as applicable).
 - Chain-of-Charody procedures, following EPA SW-446 guidelines or
 - Procedures and responsibility for data validation, as appropriate other appropriate references.

IT VIEW (III'M AM)

SO SCHI SCUPE OF WORK

SI INTRODUCTION

- 1. The Sire Control and Monitoring (SCM) Program consists of the following tasks

- Task S. 1 Gas Mangement
 Task S. Stormwarer/Erosson Control
 Task S. Landscaping/Irrigation
 Task S. Access Roads
 Task S. 4 Access Roads
 Task S. Fereing
 Task S. 6 General Faculties and Utilities

Discussions in this section for each of these activities include the following tienty as **Appropriate**

- Components
- Operational Objectives
 Maimenance Objectives
- Montoning Objectives. Improvement Objectives.
- Also, the following itst illustrates the approximate types and numbers of components currents provides an approximate summary of the monitoring activities currently being implenented change over some. The monitoring requirements shall be detailed in the Operation's Manual (Chapter 4.0). In order to illustrate the level of monutoring required, however, Table 5.1 Specific monitoring activities are not discussed separately for each task because they will being monitored
- Observations of general field conditions
 Operating performance of sire mechanical systems
 Formerer gas probest as 25 locasions.
 All sides probest as 24 locasions.
 All sides probest as 24 locasions.
 Offsire meter boxes as about 100 locasions.
 North Parcel langfall gas monitoring probes as 15 locasions.
 North Parcel langfall gas monitoring probes as 15 locasions.
 North Parcel langfall gas monitoring probes as 15 locasions.
 The menoprobagical station.

-09/-

- Geoechnical instrumentation including prezenters, unclinometers and surface monuments.

 - Improvements to the monitoring system
- Also, improvements are not discussed with each task, because they are considered in be posensul activities. Instead, Table 5.2 illustrates the type and proposed schedule of improvements considered to be appropriate by the Work Defendants ä

2 Operational Objectives.

- Maintain custing and improved onsite vegetation in a condition which effectively controls erosion, especially on the sieeper slopes. New vegetation selection should consider arrigation requirements, root depth, fire potential and other factors which could affect performance and **MAINTENANCE PROMITEMENTS**
- Avoid over irrigation which could result in unnecessary infiltration ions the leadfill.
- 3 Mannenance Provide labor, equipment, materials, technical expertise, and supervision necessary to achieve the operational objectives.
- 4 Monitoring: Table 5.1 indicates preliminary SCM monitoring activities related to landscaping! urngation. Actual minimizing requirements shall be set forth in the Interim Budget and Operations Plan and the Operations Manual
- 5 Improvements: Table 5.2 indicates potential improvements to include seeding and mulching of existing areas requiring vegetation and areas of new cover. Subchapter 8.2 discusses the procedure to evaluate each potential improvement and to obtain approval from EPA.

5.5 TASK S.4 - ACCESS ROADS

1 Components Include:

- The main access road from the entrance on the North Parcel to the auxillary flore marion.
- The loop road from the end of the access road, across the landfill deck and around the west toe of the landfill, back to the access road.
- Bench roadways which provide access around the South Parcel landfill, at several levels.

2 Operational Objectives:

- Provide access to critical areas on the size under all weather conditions.
- Maintain other access roads, as appropriate.

 Minimize the amount of mud carried into activity areas and offsite by vehicles during rainy period.
- Avoid hazards in areas requiring vehicle travel.
- 3 Maintenance: Provide labor, equipment, materials, sechnical expertise, and supervision necessary to achieve the operational objectives.

Re- \$7/06 (2.44 PM)

1 Components Include

- Interior gas extraction system wells, surface collectors, convey ame components and flare station
- Perimeter gas extraction system wells, conveyance components, main flare station, and auxiliary flare station
- Penmeter air dike system, compressor station, wells, conveyance components and probes
- Landfill cover as it relates to emissions
- Gas-related improvements.

2. Operational Objectives:

- Minimize surface emissions and subsurface gas migrations to the extent practicable with those systems which are in place or improved
- Mitigate emissions from surface cracks, where practicable, by applying cover material, by monitoring, or by other approved means, to assure emission levels do not increase exposure risks in public or worker exposure areas.
- Operate each flare station above 1400°F or as otherwise approved
- Mingaic subsurface fires to the extent possible
- 3. Maintenance: Provide labor, equipment, materials, technical expertise and supervision necessary to achieve the operational objectives and requirements, considering the computerities available and the budgeted scope of activities for each year.
- 4. Monitoring: Table 5.1 indicates preliminary SCM monitoring activities related to specific gus control components. Actual monitoring requirements shall be set forth in the Interim Budget and Operations Plan and the Operations Manual.
- 5. Improvements: Table 5.2 summarises improvements which potentially should improve the Gas Management System, especially in the areas of greatest potential for public exposure Subchapter 8.2 discusses the procedure which shall be used to evaluate each potential improvement and to obtain approval from EPA.

Rev. 8/9/88 (2.44 PM)

5) TASK 5.2 - STORMWATER FROSION: CONTROL

1 Commons lackude

- Down drains and inlet seructures. Beach gusters and refets.
- Toe of landful channels to storm drains or flood control drains. Landfull cover as it is affected by session. Drainage and eresion control improvements.

2 Operational Objectives:

- Mingrate subsidence, cracking or ponding to the essent practicable.

 Mingrate areas of significant erosion as soon as possible after discovery.

 Take steps to minimize crosson from soom events, wherever possible (c.g., improve and maintain size grading).

 Administration for imaginy of onsize facilities, and systems as a result of crosson and needle effects.

)

- Maintenance: To provide labor, equipment, materials and supervision necessary to achieve the operational objectives, to the extent practical with the existing see conditions
- stonmentschotton contrel. Actual monitoring requirement shall be set forth in the Interm Managing: Table 5.1 indicates preliminary SOM maniering activities related to Budget and Operations Plan and the Operations Manual.

•

crosion and ponding from all types of asoms, and (3) decrease the potential for major erosion which are intended sec. (1) improve statements management, (2) decrease the potential for Improxements: Table 5.2 memorines improvements proposed by the Work Defendants failures. Subchapins &2 discusses the procedure which shall be used to evaluate each potential improvement and to obtain approval from EPA. •

Construction Inches

- The intenden water par The tree bestreet system

- The NW stope system. The Oil informs system, presently being operated by Operating

2: WH (2:4 PL)

Operational Objectives ~

-

- effectively conside stoken, especially on the sweper slopes. New vegetabon selection should consider simplision requirements, non-depth, fire potential and other factors which could affect performance and Maintain existing and emproved onsire vegetation in a condition which maintenance requirements
- Avoid over strigation which could result in unnecessary infilitation time the landfull.
- Maintenance Provide labor, equipment, materials, technical expense, and supervisor necessary to achieve the operational objectives
- Manitang: Table 5.1 indicates preliminary SCM manitoning activities related to lands, uping? erigation. Actual monitoring requirements shall be set forth to the favential Budget and Operations Plan and the Operations Manual.
- Ingrovements Table 5.2 indicates potential improvements to arclude seeding and mulk hing of existing areas requiring regelation and areas of new cover. Subchapter 8.2 discusses the procedure to evaluate each potential improvement and to obtain approval from EPA

5 5 IASK 5.4 - ACCESS ROADS

Commonents Include:

- The main access road from the entrance on the North Parcel to the auxiliary flare station.

 The loop road from the end of the access road, across the landfull dech and around the west toe of the landfull, but it to the access road.

 Bench roadways which provide access around the South Parcel landfull, at several levels.

2. Operational Objectives:

- Provide access to critical areas on the size under all weather conditions
 - Maintain other access roads, as appropriate. Minimize the unbount of med carried into activity stras and offsire by

 - vehicles during rainy partod. Avoid hazards in areas requiring vehicle travel.
- Maintenance: Provide labor, equipment, materials, technical expenses, and supervision necessary to achieve the operational objectives m

L. LASS (24 PL)

- observation of conditions to determine if repairs are required. Actual intransong requirements Manistring Monitoring of the access roads (Table 5.1) currently consuss of weekly visual shall be set forth in the Interna Budget and Operations Plan in the Operations Manual
- languements Table 5.2 summarizes improvements proposed by the Work Defendance to satisfy the indicated operational objectives. ~

S & IASK S.S. FENCING

Conscern leclade:

- The perimeter fence, uncluding gases as several locations. Institut fencing at the trader compound. Here stations, and recoordigical

- The outracy gae. Feacing related improvements, if any.
- Optrational Chingsiggs: Oppositues with EPA and its security constructs to discourage unsuthansed carry. ~

)

- Maintenang: Provide labor, equipment, mastrials, technical experties, and supervision recessary to achieve the operational objectives. _
- observation for damage which requires repair. Actual monitoring requirements shall be set Monitoring: Monitoring of the fenots (Table 5.1) currently consists of weekly visual forth in the Interim Budget and Operations Plan and the Operations Manual.
- 5. Impropresents: No unjer fence improvements are planned at the present time (Table 5.2).

1. Component lectude:

- Office and laboratory emilers.
- Utilizier.
 Health and safety and menicoring or Ocean Commencement system.
 MIS system.
 Proceedings for the commencement system.

)

1: 254 (R. 79 AM)

2 Operational Objectives

-

Provide support for the staff and equipment required to accomplish the SCM activities on a routine basis.

;

- Provide support to respond to unanticipated events and emergencies Provide procedures for maintaining and reporting accurately the SCIM activity and monitoring results.
- monitoring requirements shall be set forth in the laterim Budget and Operations Plan in the 3. Mainteaux: Provide labor, equipment, materials, technical expertus, and supervision Manipping: Currently consists of weekly visual observations (Table 5.1) of general conditions and a anomaly detailed check of emergency response capabilities. Actual nocessary to achieve the operational objectives. Ť.

Operations Manual.

Re- 1000 (10.39 AM)

6.0 LMS SCOPE OF WORK

-

6 INTRODUCTION

This chapter presents the Scope of Work for the Leachase Management System (LMS) in the cofforming sections:

Task L. 1 - Leachase Control, Maintenance, Manuscring and Improvements Task L. 2 - Offsier Transport and Treatment Task L. 3 - Leachase Treatment System (L.TS) Design, Construction,

Survey and Operator

Task L.3a - Protesign Activisies Task L.3b - Plant and Facilities Design Activities Task L.3c - Procurences and Construction

Fask L. 3d - Sugrap

Test L.3c - Operations Task L.3f - Final Construction Report

The overall LMS areas of responsibility include:

Management, maintenance, monitoring and improvements to the lexitude extraction and conveyance systems.

Mangement, maintenance, monitoring and improvements for storage facilities associated with pas condensate, decontamination washdown and waters produced by R.UFS acquisits.

Office transport and treasment of liquids which cannot be breased onsur

Design, construction, maintenance, monitoring and improvements to collection transport and storage systems for inquisis to be trained.

Design, construction, startup, operation, maintenance, amonitoring and improvements to the exercise LTS for straining and offliness disposal of onsise generated injustic.

6 1 IASK L - LEACHATE CONTROL MAINTENANCE MONITORING AND PAPENDENCHIS

1. Conspany Include:

- Arts I collection system, including shallow french drains to control seconds, 36 inch diameter respicate wells and one deep manuscring well.
 - im, including estraction wells, conveyance system to Acts III and several inactive reinjection wells. Area B collection system

Ac. 15/70 (4.53 PM)

Re- 40/48 (4 5) PM)

Area III collection system consisting of a shallow french drain system, burned seed tasks, a gravel collection some, an off-landfill french drain and less have collection sump system, and pumping and conveyance system to the above ground tasks in Area IV.

.

- Area IV collection system which includes shallow gravel ereiches, an unlaned sump, and a pumping and conveyance system to above ground storage tanks, also increed in this area
 - Area V collection system which consus of shallow gravel arenches, and leachare disposal borngs
 - The for butterss collection tanks.
- The onsire storage in Area IV, which consists of leased portable above ground storage tanks in protected berns.
 - The condensate collection tank is the seemor gas system flare sunon
 - The storage tank for potentially contamined water at the vehicle decontamination facility

Operational Observers

- Transfer collected leachase and liquids to above ground storage tanks.
- preneatment facilities or conveyance systems as necessary. Provide onsite portage switche for the volume of liquide being handled usuil a new recomen plant system becomes available.
 Missake surface seeps offsite immediately upon discovery.
 Missake potential offsite subsurface scepage if possible with systems which are in place as the time.
- Minneaunce: Provide labor, equipment, marerials, technical expense and supervision necessary to achieve the operational objectives.

4. Maniscing: The following are approximate monitoring activities for the LMS program

- Volume of leachest and liquids generated by collection area, if possible Characteristics of liquids collected by area sens-annually. Depth of liquid is extraction wells on a quarterly basis. Evidence of leachest seaps as descrinised from routuse observations of Surface conditions.

Actual monitoring requirements shall be set forth in the Interim Budget and Operatons Plan and the Operations Manual.

- they could significantly improve leachase control, the following additional potential to reduce or elemente reliance on unlined samps and underground storage lanks. Because Improvements are bring accomplished in Areas III and IV unprovences will be considered:
- Installation of pumps into any new perimeter gas magnition control well-
- sulfacion of pumps into existing wells/borings and new deep slope
- installed pump systems.

 Expansion of existing french drains, where appropriate Installation of conveyance, presentent and storage facilities for newly

putertial improvement and to obtain approval from EPA. Subchapters 1.3.5 and 8.2 discusses the precedure which shall be used to evaluate each

6 1 LASK L.2. OFFSITE TRANSFORT AND TREATMENT

Camponens lockets

- Transfer of liquid from ensite storage tanks to an offsige, RCIA permissed TSD facility for
- All collected biquids prior to beamcon plant construction.

 Any collected liquids which cannot be adequately beased by the onsite beamcon plant.
- Appropriate task trucks for the types and volumes of liquids to be transported.

Response Actions (Off-site Policy) dated November 13, 1987 (EPA OSWER Directive of CERCLA, as amended, and EPA's Reviewd Procedures for Implementing Off-size The RCRA-permined TSD facility shall be approved in accordance with Subsection 121(d)(3)

- 2. (Decrational Objectings: Provide all services, equipment, vehicles and material required to salely transport and dispose of collected liquids from the size
- Maximing: Exemples of manioring of office exemporation include:

(

- mos of inventories of pumped volumes from each collection
- aco of the returned manadeque
- DAY CELLE SEVELA MED instructions. No major improvements for this activity are placed as the present time

64 TASK L.3 LIS DESKIN, CONSTRUCTION, STARTUP AND OFF RATION

The LTS design, construction, startup and operations shall be conducted in a manner which is consistent with the Leachase Management ROD

641 TASK L.34 - PREDESIGN ACTIVITIES

- The LTS predesign activities shall result in a Prodesign Report to provide information, including the following
- Selected pretrament, storage, equalization and main trainment processes Selected site configuration. Selected pipeline routes.
- Final design workplan
- Effluent and residuals handling requirement
- The predesign activities include the following major tasks, which are described in the following sections:
- Task L.3a.1: Identification of the range of liquid quantities and qualities which must be handled by the treatment facilities. These data are essential to determine: (1) influent storage and equalization requirements. (2) special pretreatment requirements for some or all liquid streams. (3) the most appropriate treatment system, uncluding component sizes. (4) the range of conditions which must be handled without causing system upsets, and (5) liquid collection systems management to avoid
- conditions outside of the LTS facilities' capacity
- BESUMEN PROCESS. Task L.3a.2: Identification of performance requirements for the liquid effluent, LMS related air crisissons, and sludge residues from the
- Task L.3a.3: Initial screening of processes to determine the types and range of bench/pilot tests to be conducted.
- Test L.3s.4: Preparation of a Bench/Pilos Tessing plan.
- Tast L3a.5: Conduction of the Bench/Files menability studies
- Task L.3a.6: Selection of the anou appropriate process type, capacity and configuration to self the anticipated quality and quantity of leachase, performance requirements, and physical site conditions.
- Tast L.3a.7: Preparation of the Prodesign Report, which shall form the basis for proceeding with the actual LTS design.

Rev 15/00 (4 3) PM)

6.4.1.1 Jask L. Ja. J. - Quality and Quantity. Characterizations

S

Laured Outling for Investigate

- I 'Justiny characterization of the liquid to be treated shall unclude
- The range of expected concentrations of constituents for estimated normal flow conditions:
- The range of concentrations of constituents which may cause process upkis
- Special consistents of interest (e.g., a continuent which would meet each standard, but could have adverse effects on some vegetation if the effluent 15 used for empasion).
- The se characteristics shall be determined by a combination of: (1) evaluation of the historical condition. For example, pumpage from one or several wells could be slowed or temporarily don base, (2) specific source analyses currently being guidanned by the EPA, and (3) bess CHUTHARS Of the conditions that may result from other (e.g., SCM, RUFS) activities. The individually consolled for short and/or long term periods, if required to avoid an upset procedures shall include consideration of the extent to which each flow volume can be evaluacon of posmeial effects of different sources on equalization and/or segregation Support of those wells were producing leachese requiring special handling ĵ
- kachae removal acuviaes shall also be incorporated. These esamenes shall provide a busin (iv Prelimenary characterization of the quality of lequids which may be anticipated under (ull scale evaluating the potential securporation of the LTS into the final remody.

Liquid Quantity for Tresorbility

- 1 Linux quentity estimates shall include consideration of
- Pust and present trends. Expected effects of related site activities, such as itschare extraction, gas creationses generation and weakflown activities.

 - It stropeologic results plant.
 Efforts to relate the potential for landful liquids to constructed water.
 Other activities which may impact liquid volumes.

Re- 1568 (1.5) PM

The extirmates shall consider continuous flow sources and the potential for shart term peak and relationships between quantity and quality extremes shall be correlated to determine limiting opamize the combination of storage, equalization, unegration and prix essing. Also conditions

Equalization - Options and Limitations

- determined from the quality and quantity data. The evaluation shall include consideration of 1. The required influent storage and equalization system capacities and flexibiliary shall be
- Instrumentation and conerols.
- Sizes and interconnections between tanks.
- Opposes for oil and grease or VOC removal from individual influent

 - streams or after mixing.
 Temporary extra storage for liquids requiring special handling.
 Control of emulsification potential.
- Emergency containment requirements
 Location with respect to collection, transport and treatment systems
 Possibilities for special treatment for certain streams.
- 2. If predictions indicate the potential for quality or quantity upsets, even with a conservative equalization system, controls on other source streams may be necessary

6.4.1.2 Task L. 3a.2 - Performance Operia Determination

- In addition to the analyzes conducted in the Leachase Management Feasibility Study and ROD. performance criteria may be determined based on at least the following factors
- Local, State andfor Federal standards determined to be ARARs for the type, location and configuration of the weamon facilities selected.
- Cost/quality endocff evaluations, when appropriate, such as: (1) sludge quality and disposal costs, or (2) effluent quality and special POTW
- Special rechaical considerations such as effects of quality on vegetation or an impation option.
- Performance enteria shall be established for liquid effluents, air envissons and sludges as discussed in the following sections. ~

Re- MARI (43) PM)

Liftiera Quality Oriena

- I Two liquid offluent options for onsire treatment are (1) discharge into a POTW Los Angeles Crimity Sanisation Department (LACSD) sewer pupeline, and (2) use or the effluent as onvite Wigarion water after blending with other emgation water sareans.
- The effluent may be discharged to the POTW, based on standard pretreatment and discharge limuts consistent with ARARs.
- If effluent is considered for irrigation, at least the following factors shall be evaluated
- Regulatory concentration limitations for water as applied to the ground

- Consistent limitations for existing or desirable types of vegetation Costs for effluent storage during extended rain periods.

 Blending potential for present application raies and shote which may be modafied by other site activities, including final remodities.

 Qualities and costs of waters for blending, such as first dinaking water or recycled saniary presences plant offlicen.
- 4 The following factors may also be considered in establishing the effluent quality.
- The requirement (if any) and schedule for delisting of listed hazardous
- Predictional analyses requirements, and the relond potential effects on the System.

All Emissions Criedia

- combustion air as a flare station, (3) activised carbon breamen as the location of greatment or 1ºses shall be convolted by: (1) direct discharge for permissible small sources, (2) use as To the extent practical and as required by applicable laws and regulations, the LTS shall be enclosed so that off-grees are contained. As determined during design, emissions of off-LOTEGE, OF (4) Other means.
- Air quality performance criteria for new emission sources shall be determined using applicable standerds, including integration with other title activities to appropriate. ~

Br. MAR (4:53 PM)

Sludge Performance Course

2

- 1 Application of sludge performance enterta (e.g., chemistry, solids content), anti-spated volumes and storage, and handling and disposal costs of different sludge types shall be incorporated in the cost-effectiveness evaluation
- Studies, as appropriate to determine waste management procedures, shall consider delixing and special analyses costs for sludge which may be determined to be hazardous

Process Flexibility and Redundancy Strategies

- An important sizp toward process and location selection (to be made consistent with the Leachave Management ROD) shall be the determanation of the amount of the utilities and redundancy required to:
- Optimize the combined collection, storage and treatment activities. Provide commissions operation for a reasonable range of influent
- Avoid excessive plans shuidown periods, which could adversely affect the collection operations.
- As example of flexibility would be to provide a piping arrangement, controlled by valves, to allow the operations personnel to use different portions of the LTS for treating liquid streams with dissimilar chemical characteristics. An example of redundancy would be to provide two reactions in parallel, as opposed to a single larger tank, so that the entire system would not be shut down during a maintenance period.

6.4.1.3 Task L. 3a.3 - Trenshility Serrening

- physical/chemical, powdered activated carbon, air stripping) having the potental to satisfy the quality/quantity estimates, performance criteria and the flexibility strategy, in accordance with keachase samples shall be undertaken to eliminate the least destrible process arrangements and the Leachine Management ROD. Then, initial bealest scale laboratory tests on representative Treatability screening shall be undertaken to identify the alternative treatment systems (e.g., to select chose appropriate for larger scale bench/pilot test areasbility evaluation
- Treatability screening shall consider: (1) feasibility based on state of the art knowledge and initial beaker scale iests, (2) capital costs, (3) operating costs, (4) net present worth.

Res LOAD (4 33 PM)

effectiveness. (8) state and community acceptance, (9) consistency with the anicipased limit (5) flexibility. (6) compashility with probable long-term solutions, (7) long and short term renedy, and (10) applicable EPA Guidance.

6 4 1.4 Insk L. 3a 4 : Bench/Pilot Texang Plan

- 1. A plan to guide the program shall be proposed by the Work Defendants and approved by the EPA prior to beginning the formal benchipilias seeing activities. The plan shall metude the following elements:

- Internate to the processor of the second of
- Safety, Health and Emergency Response Plan. Sampling, Analysis and Quality Managemens Plan.

6 4 1 5 Test Lile 5 - Beach and Pilos Scale Treambility Saudies

- Appropriate evances processes shall be selected for the benchipsion sessing program. If the flexibility strengty shows benefits for including optional flow pashs for certain sources, the bench scale program would be expanded to test each configuration which may be selected
- Final treatability acceptance tests shall include the following snage of influent characteristics
- The expected quality after equalization or exprepation. Maximum concentrations of the most difficult consistents which could be
- metal uper conditions countd by unusual second quality/quantly
- The maximum rate of through put flows anticipated.
 Presented upont conditions caused by operator error or misoperations
- The transmilling performance shall initially be evaluated against the performance requirements identified in Subchapter 6.4.1.2. Those processes which pass these requirements shall be included into the final sciention process.

1- VIEW (11:35 AM)

6 4 1.6 Task L. Ja 6 - Final Process Selection

:

- The final process, or combination of processes selected, shall be determined by an evaluation of as leass the following factors, and in a manner consistent with the Leachase Managemeni
- Bench and piles scale performance, including shiley to men performance
- Antergreed reliability (avaidance of prolonged shurdowns) in spire of
- unfluent changes or nesoperation.
 Seesfaction of the flexibility sense gy.
 Operational processing costs.
 Operational procedures.
 Companibility with the potential final remody.
 Public health and safety.
- -691-2. Evaluation of each process configuration shall consider the posential for using only portions of improved. Examples of this include: (1) that pumped ground water would only be subjected the system to treat some of the inflowing liquids, if cost or operational efficiencies could be reparation, if other inflowing liquids do not have signaficant quantities of these constituents constituents of interest; or (2) only a portion of the flow may be subjected to oil and greak to air or seean stripping prior to discharge if VOCs are determined by EPA to be the only
 - some professment processes near the source shall be evaluated. If appropriate, the following determined from: (1) the estimates of the influent quality and quantity.(2) the sensitivity of generate liquids requiring treatment. The desirability or necessity to provide equalization or activities, the gas control operable usat, and the RUFS hydrogeologic program, which may the plant to uppers, and (3) the range of operational conditions unocipated for other SCM The number, size, location and interconnection of individual equalization tanks shall be may be considered in performing this evaluation:
- If oil and great are to be removed from only one or a few of the total nowers, it could be desirable to remove those consciouents before equalization occurs.
- It could be exemplal to avoid conditions which can cause emulsions, such as pumping de ligad a long distance.
 - Air stripping and/or astration of cartain sectants might produce off; gass most appropriately removed by incincration or flaring at the landfull gas flare streon. These determinations will require close coordination with the EPA and other constructors.
- pH consol or special descaling procedures may be required for some sereams to reduce the potential for corresion or clogging of main liquid transport systems.

Rev (VIEWS (11.55 AM)

Capacity Sciences

- 1. The presument plant capacity shall be selected on the basis of such factors as
 - Rates based on historical and planned activities
 - The potential for large changes in quality as the result of other site **ACBVILLES**
 - The degree to which the LTS can serve as part of the final remedy
 - The unital working period (hours and days) and increased capacity possible from increasing the operational time.
 - The use of batch or continuous flow processes.

 - Cost to volume relationships for key equipment.
 Difficulties in modifying a component because of grading or installation. requirements.
- 2 Specific components may initially have different canacities depending on cost and operational efficiency and himitations on future modifications or improvements. For example, the influent and effluent storage may be built in stages to accommodate increasing flow rates

System Configuration

- At least the following shall be considered factors for determining the plant configuration

 - The plant location.

 Available suitable land area.
 - I oundation conditions
 - Site boundaries and buffer zones.
 - The configuration of individual plant components.
 - Advantages of physically separating portions of prevenuent or coustization.
 - Potential requirements for expanding key components or the entire
 - facility.
 - Spill containment capabilities.
 - Operation and mains mance convols
- 2 Special design factors, such as required containment volume, seismic loadings and the powersial for facility expansion, shall be included in the desermination of the overall plant size and its configuration. For example, both a concrete pit containment and a diked containment s) stem shall be evaluated.

Ber 44/85 (4.53 PM)

-62-

- 3 Factors to be considered for determining the leachaire influent transport system configurations shall include
 - Amicipated collection points for leachate, landfill gas condensate. equipment washdown, and liquids from RVFS activities
 - The flexibility and redundancy swategies (see Subchapter 6.4.1.2)
 - Options ranging from complete piping systems, suitable for both unterim and long term flows to vacuum truck transport for an appropriate period
 - The need to incorporate certain pretreatment or equalization elements nearer the collection point than the treatment plant

6 4 1 7 Task L. Ja.7 - Predesign Report Preparation

- 1. The results of the predesign tasks shall be used to prepare a Predesign Report. When approved by EPA, this report shall direct the LTS design task. The Predesign Report shall include at least the following basic elements
 - Introduction and Purpose.
 - Results of the Prodesign studies including:
 - Liquid quality and quantity estimates.
 - Influent storage and equalization requirements.
 - Special pretreatment requirements.
 - The anticipated range of conditions to be encountered.

 - Effluent and sludge performance criteria. The redundancy and flexibility evaluations
 - Results of the bench/pilos tests.
 - The evaluation used to recommend the final LTS system.
 - Description of the selected system.
 - Addendum to the General Sampling, Analysis and Quality Management Plan, if appropriate.
 - The LTS Design Basis Manual, as described in the next section.
 - The recommended design review steps and achedule.
- 2. The Design Basis Manual shall describe, as accurately and quantum velv as possible, the criteria which the design activities must satisfy. The manual shall include at least the following basic elements:
 - Introduction and Purpose.
 - Performance Requirements.
 - Effluent Performance Chieria
 - Air Emission Criteria.
 - Sludge Performance Criteria
 - ARAR Requirements.
 - Sixing Requirements.

Rev 8/9/64 (4 5) PM

64? TASK L.36 - PLANT AND FACILITIES DESIGN ACTIVITIES

- 1 The design phase shall consist of preparation of final plans and specifications for the complete LTS. The design shall be directed toward satisfying requirements specified in the Design Basis Manual. For convenience of review and construction, design packages shall be divided into three basic functions:
 - Presentation facilities

 - The measurest plant.
- 2 The design shall be submitted for review at the three (Intermediate 50%, Prefinal-90% and Final) or four (Preliminary - 30%, Intermediate - 60%, Prefinal - 90% and Final) levels of completeness as approved by the EPA Project Coordinator based on review of the recommendation provided in the Final Design Report.
- 3 Design subtanks include:
 - Identification of all permits, approvals, and the access agreements required for the project, including a description of the data requirements and annecessed approved schedule for each.
 - Assurance that ARAR requirements are analyzed and incorporated, as appropriate, into the design. Controlling parameters as required by such standards shall be identified.

-64-

Br. \$7/60 (4.53 PM)

exists. Value engineering screening shall be bisuted to project refinements which would not suggificantly change or after the approved remedy. unless otherwise approved by EPA. Value engineering screening shall consist of listing high cost items that have a potential for cost savings EPA may approve a formal value engineering study for those areas which exhibit reasonable potential impacts on the remedial action project schedule and budget for a formal value engineering study shall be identified and provided to EPA upon request

Value engineering screening in areas where a potential for cost savings

- Inclusion in the technical specifications of contractor requirements for providing appropriate service visits by expenenced personnel to supervise the installation, adjustment, startup and operation of the treatment systems, and appropriate operational procedures training once the startup has been successfully accomplished.
- A Detailed Cost Estimate including a summary sheet, quantry take off sheets, and all work broken into labor, material, plant, supervision and administration and contingencies.
- 4. Each Design Package shall include at least the following items, completed to a level compatible with the design stage:
 - The procedures and schedule for obtaining permits, approvals or access agreements, as necessary. The permits, approvals, and access agreements, as necessary, should be obtained prior to the time of the Prefinal Design submitted
 - The flow diagram and P&ID for collection piping and plant systems
 - System general arrangement, showing locations of:
 - Collection Points.
 - Proclines and Pumps.
 - Tants.
 - Equalization and Pretreatment Systems.
 - CONCERNMENT SYSTEMS.
 - Treatment Plant Outlines.
 - Access Roads and Parking Loss.
 - Office and Lab Seructures. Fence Lines and Cones.
 - Minimum dimensions to property lines.
 - Easement or right-of-way locations for offsite pipelines, if appropriate

 - The POTW say-in location, if appropriate.
 The location of irrigation blanding facilities, if appropriate
 The preliminary arrangement for controlling drainage at each system component.

 Mechanical, electrical/lestrementation and civil/structural plans for the

 - Special conditions and construction specifications
 - Engineering calculations used to determine component sizes, structural designs and the control of drainage.
- The Startup and Operations Sections for inclusion to the SCM/LMS Operations Manual
- Addendum to the General Safety and Quality Plans, if appropriate

Rev 0/18/88 (12 08 PM)

- Description of Startup procedures:
 - Prestamp equipment testing and system calibration.
 - · Instal reagent handling
 - Step-wise procedure for initiating flow into each component
 - Initial flow constraints.
 - Systems checks to evaluate performance.
 - The desirable flow build-up schedule.
 - Operator training procedures.
- Integration requirements with other site activities which:
 - Can affect liquids requiring treatment
 - Can be affected by the operation of the LTS.
- Description of Normal Operation and Maintenance:
 - Description of tasks for operation.
 - Description of tasks for maintenance.
 - Description of prescribed treatment or operating conditions.
 - Schedule showing frequency of each operational task.
- Description of Potential Operating Problems:
 - Description and analysis of potential operating problems.
 - Sources of information regarding problems.
 - Cummon remedies.
- Description of Rousine Monitoring and Laboratory Testing:
 - Description of monitoring tasks.
 - Description of required laboratory tests and their interpretation.
 - Required OA/OC.
 - Schedule of monitoring frequency and when, if so provided, to discontinue.
- Description of Alternative Operations:
 - Alternative procedures to prevent undue hazard, should systems (as)
 - Analysis of vulnerability and additional resource requirements should a failure occur.
- · Safety Plen:
 - Description of precautions, necessary equipment, etc., for site personnel.
 - Safety tasks required in event of systems failure (as an addendum to general site safety plan).

Re- 2/940 (4.5) PM)

- · Description of Equipment
 - Necessary compress for operations
 - Installation of monitoring computerity
 - · Maintenance of site equipment
 - Replacement schodule for equipment and installed components
- An Operations annual budget which should include but not be limited to the following:
 - Cost of personnel.
 - Costs of preventive and corrective maintenance
 - Costs of equipment, supplies, etc.
 - Costs of any contractual obligation (e.g., lab expenses)
 - Costs of operations (e.g., energy costs)
- Records and Reporting Mechanisms Required
 - Daily Operating Logs.
 - Laboratory Records
 - Records for Operating Costs
 - Mechanism for reporting emergencies
 - Personnel and maintenance records.
 - Monthly/Annual Reports to State agencies
- Appendices Describing:
 - Regulatory and Permut Requirements
- Manufacturer's Equipment Data

The LTS Operations Manual shall be prepared as a separate insert for incorporation to the SCM/LMS Operations Manual as described in Chapter 4.0. General topics in the SCM/LMS Operations Manual not be duplicated.

6.4.3 TASK L.3c - PROCUREMENT AND CONSTRUCTION

- Administration of the bidding process and contractor selection shall be in accordance with the procedures established by the Work Defendants. The EPA shall be provided with qualifications of selected contractors.
- The Special Provisions Section of the specifications shall identify the contractor's
 responsibilities regarding onsite activities and special requirements such as quality control
 procedures or health and safety precautions.
- The Special Provisions Section shall also include a completion schedule for plant startup and beginning of normal operations. If necessary, the schedule may be modified by agreement of EPA and the Work Defendance based on input received from the contractor.

Rev. 8/9/00 (4.53 PM)

construction. The oversight functions shall include at least the following items Procedures and achedules for the review of contractor submittal

4 The Work Defendants shall movide unchained and management oversight for LTS

- The former of weekly construction meetings
- Procedures for making engineering interpretations of the plans and specific appear
- Procedures for interpreting the technical, schedule and cost impacts of proposed field changes and contract modifications. Procedures for documenting field changes.
- Procedures verifying and documenting compliance with quality control COMMONICOUS.

A44 TASK L M. STARTUP

1 The startup procedures in the LTS Startup and Operations Section of the SCM/LMS Operations Manual will be the guide for premartup againment testing. The revised Section following prestartup will be the guide for plant startup activities.

AAS TASKE & OPERATIONS

1. The operations number of the revised LTS Startup and Operations Section of the SCM/LMS Operations Manual will be the guide for operating the LTS under both normal and abnormal conditions.

6.4.6 TASK I. W. FINAL LTS CLOSEOUT REPORT

- 1 A Final LTS Closeous Report shall be prepared and submitted to EPA within 8 weeks from plant start-up. This report shall include at least the following items:

 - As-built plans and specifications. Quality Control Records.

 - Explanation of significant changes which occurred compared to the design and the potential impact of those changes on performance.

 Discussion of actual expanditures vs. budget projection.

 - Importance of the project expensace to future project activities. Suggestions for modifications, which should be made to future construction of similar or related items.
 - Revised LTS Startup and Operations Section of the SCM/LMS Operations

7.0. PRELIMINARY AND PROPOSED SCHEDULES AND PROPOSED BUIDGET FOR WORK DEFENDANTS PROPOSED SCOPE OF WORK

7.1 INTRODUCTION

- 1. As discussed in Subchanter 1.2, the Work Defendants intend to undertake certain improvements which they believe shall accelerate completion of important environmental improvements for the site. This chapter provides the proposed schedule, budget and Potential improvements Categories which the Work Defendants believe are appropriate for this work However, the EPA cannot initially commit to approve specific improvements until (1) appropriate insplication studies have been completed, and (2) there as assurance that basic SCM and LMS activities during the initial five year period shall be adequately accomplished with remaining "Work" Escrow Account funds pursuant to Paragraph C of Section 12 (Work to be Performed) and Section X (Escrow Account) of the Decree.
- 2. The Project Proposal Plan (Chapter 4.0, Item 9) will be used during the Pretransition and Transition Periods to further evaluate the need and schedule for preparing potential improvement proposals. The schedules discussed in this Subchapter will be modified as a result of the Project Proposal Plan
- 3. The proposed schedule for the overall program is illustrated in the following two formals
 - Figures 7.1a and b, which present a detailed schedule for the first 2 years. (104 weeks), beginning on the effective date of the Decree. The preluminary schedule for each activity shows the various stages of Work Defendant activities and EPA reviews according to procedures presented in Chapters 8.0 and 9.0.
 - Figure 7.2, which presents a summary of the entire 5-year period
- 4. Table 7.1 presents the proposed budget for the 5-year program based upon performing the basic site control functions, constructing an on-site treatment plant and performing the anticipated improvements. The budgets for each period correspond to activities shown in the schedules
- 5. The proposed data are described in the following subchapters
 - 7.2 Pountal Improvement Categories
 - 7.3 Proposed Schedule
 - 7.4 Proposed Budget

.-177-

I in order to prepare the schedule and budget, priorities for potential improvements will be established through the Project Proposal Plan and SCM/LMS Master Plan approval process. described in Chapter 4.0. For purposes of this document, the potential improvements are preluminarily divided into the following 3 categories, which are then used to develop the proposed budget and schedule set-forth herein:

26

- Category I Those improvements which should be decided upon before finalization of the SCM/LMS Master Plan, because of their importance to the overall planning and control activities. Those include
 - Expansion of the gas perimeter well system.
 - The air dike replacement.
 - Procedures for improving drainage control.
 - Construction requirements at the base along the south and west boundaries.
- Category II Those improvements which should be well defined, but not necessarily decided upon, at the time of preparation of the SCM/LMS Master Plan because of their potential importance for deciding upon: (1) a Category I item or (2) maintenance and minor improvements which might be undertaken during the first year of SCH4LMS activities. These include:
 - Placement of cover on the bottom two banches (e.g. bottom 80 feet) of the south and west slopes.
 - Installation of slope gas/leachest extraction wells.
 - Additional improvements to the existing liquid collection and storage
 - formalisation of additional number in wells and the related collection system.
- Category III Those improvements which: (1) cannot be defined until higher chargery items are decided upon or (2) do not have significant potential importance to the first year of activities in the Master Plan.
 - Improving the existing flore stations.

 Landscaping/Arrigation improvements.

 Access Road Improvements.

U-1/61 12 15 PM

The following subchapters describe why each item is included in the specific category for the proposed schedule and budges.

7.2.1 CATEGORY LIMPROVEMENTS

- 1 Both the Work Defendants and EPA believe that gas mygration at the winth and we it boundaries should be reduced and that apparent undestrable aspects of the air dike should be addressed as soon as possible. Therefore, some improvements to the perimeter control system and chromation of the air dike should be accomplished during the first year, if possible
- 2. Drainage control is considered to be important because the potential for Site damage to occur in the event of a large stories; and drainage control is related to most other SCM/LMS systems since: (1) its configurations must be compatible with these other systems and/or (2) the failure of the drainage system could affect the integrity of these other systems. Therefore, drainage control for the Site appears to be an improvement which should be evaluated as early as possible.
- 3. An early decision as to whether to conduct an improvement to establish a working foundation on the south and west boundaries is very important because this factor will directly affect other site activities including:
 - Placement procedures and the potential effectiveness of the gas perimeter control and monitoring system
 - Procedures for drainage control on the landfill deck and south and west
 - Procedures for further modifying the existing collection and storage tank
 - Access road improvement and maintenance procedures
 - The feasibility of installing cover on a portion of the slope.
 - The feasibility of installing gas and leachase recovery wells on the south and west slopes.
 - If and how landscaping/irrigation changes should be made on the south and west slopes.

Because of the importance of this activity to the control and maintenance for much of the Suc based on current information it appears appropriate to thoroughly evaluate alternatives for preparing the base of the south and west slopes as early as possible, and to include appropriate modifications, if any, into the first years' SCM/LMS Master Plan

-641-

122 CATEGORY II IMPROVEMENTS

- 1 A decision regarding cover on the bottom two benches may not be required for the sortial SCM/LMS Master Plan. However, it will be important to consider the potential configurations for such cover so that its potential importance to other items (e.g., base preparation, perinters well placement, the potential for slope gat/leachate extraction) is well understood. The proposed schedule provides that proposed for providing cover be completed prior to completion of the Master Plan, although EPA's review and decision may occur later.
- 2 The possible timing of the installation slope wells for gas and/or leachate extraction will have an impact on: anticipated gas control performance; treatment plant capacity requirements, and flare station capacity requirements. The proposed schedule also provides for the Project Proposal for this activity to be completed in time for its probable implementation schedule to be considered in the Masser Plan.
- 3 Further improvements to the existing liquid collection system will require integration with most other improvement activities. To minimize potential conflicts or the need to duplicate the same improvement work in successive years, the basic planning of these improvements are expected to be accomplished in time for consideration in the SCM/LMS Master Plan.
- 4 The schedule and location for installing additional pumps could have a direct effect on the prodesign activities for the LTS system. For example: (1) the numbers and locations of pumps will determine the potential volume and quality of leachate which could be made available for transment, and (2) the potential examples in locations will be important for planning of collection, transportation and possibly presequences aspects of the LTS.

7.3 PRELIMINARY AND PROPOSED SCHEDULES

6444 3 30 PM

- 1 Figures 7.1a and b show detailed proliminary and proposed (for improvement) schedules for the SCHALMS activities. Appropriate partions of the schedule shall be used for specific activities, until the first year SCHALMS Master Plan is completed, or the need for changes are identified at the initial activities are being implemented.
- 2 Figure 7.2 shows an example achadule for a 5-year period. As appropriate, achedules shall be periodically updated or modified to reflect the entire SCM/LMS program.

- 26-

The proposed schedules for potential improvements reflect the categories presented above.
 These portions of the schedules will be modified by the Project Proposal Plan.

7.4 PROPOSED BUDGET

- Table 7.1 presents the Work Defendants' Proposed Budget for the 5 year SCM/LMS period
 as estimated costs, in the following sequence:
 - The pretransition and transition activities during the first 0.3 years.
 - Proposed budgets for the next 4 full years, and
 - A fifth, partial (approximately 0.7) year.
- Estimated costs for the Pretransition period correspond to the activities shown during the first 15 weeks on Figure 7.1a, including 6 weeks of in-field transition activities
- The estimated costs for years 1 to 5 in the Pretransition and Transition Category are for revising the Master Plan and Operations Manual, and preparing the Monthly Progress Reports.
- 4. Costs budgeted for improvements are based on experience by the Work Defendants with samilar activities at other locations. Each of these estimates shall be updated and substantiated as part of the Project Proposal Plan (Chapter 4.0, Item 9) and individual improvement Project Proposals (Subchapter 8.2) prepared for EPA's review and approval.
- 5. Significant cost contingencies are provided for each year's activity. If, as the work progresses, it becomes apparent that the contingency for the first years is not being utilized, the Work Defendants may recommend additional improvements to further increase control performance, reduce control and maintenance costs, or reduce final remedy requirements. Examples of such additional improvements could be:
 - · Providing cover for additional benches on the west and/or south sides
 - Providing for options for cover on the north and/or east sides
 - . The installation of additional slope gas/leachate extraction wells

60 REPORTING AND REVIEW FROCESS (DELIVERABLES)

* - INTRODUCTION

- Figures II Ia to 8 1d tillustrate the types of neveror procedures for the various deliverables required of the Worth Defendants under this Decree. Deliverable schedules are presented in Chapter 90
- The consents of the following types of documents are provided in the remaining sections of this chapter
- Subchapter 8.2 Project Proposals
- Subchaper 8.3 Type I Review Procedures
 These procedures will be used for approval of:
 Monthly Progress Reports
- Monthly Progress Reports Improvement Closeout Reports Transation Plan
- Subchapser 8.4: Type 2 Review Procedures
 These procedures will be used for approval of:

 Decises
- Designs
 Original plans, such as:
- Safety Plans
 QAXQC Plans
 Incrim Operations and Budget Plan
 SCMLMS Maner Plan
 Operations Minutel
- Revisions to Plans
- Subchapter 8.3: Type 3 and 4 Review Procedures
 These procedures will be used for moderately complex or complex
 designs, as appropriate.
- Achiques 8.6: LTS Design, Construction and Startup
- Subchapter 8.7: Emergency Repair

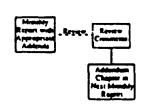

Several of the review procedures shown in the figures include review conferences to assist efficient and effective coordination between the Project Coordinators. Details of the review process, including review conferences, if appropriate, shall be established by the EPA and

Work Defendants' Project Coordinators, and will be specified in the NCMA MN MINITED FILE.

The following guidelines will be used to establish the appropriate review practice.

- The EPA Project Coordinator will coordinate with the Work Defendants Project Coordinator, and will estamate the length of each review period at the time the initial submittal (e.g., Project Proposal, Plan Dulline) is approved. Those review periods will be estamated on a case basis, considering unincipated complexity, numbers of reviewers.
- i the time of each submittal, the EPA Project Coordinator may specify it date and location for the Review Conference to be conducted, if any
- The EPA Project Coordinator may catablish a standardized, project comment form," for reviewers to use for submitting comments, or establish other procedures for incorporating review comments.
- During the review process, each comment shall be discussed if appropriate, and the EPA Project Courdinator may designate one of the following actions for that comment or establish other appropriate procedures for incorporating review comments:
- <u>Socoped</u> The Work Defendants will incorporate the comment into he next deliverable.
- Accepted as Medified. The Work Defendants will incorporate the modified comment into the next deliverable.
- oodied comment uso the next deterorable.

 <u>initiated</u> The comment recod not be considered further:

 <u>DRe Sandred</u> The Work Defendants will further evaluate the
 memory and will report the results and related action in the next
- resiverance. <u>Daplicase</u> - The common is a deplicate of a prior common which was resolved.
- hdgwn . The commemor wishdraws the comment
- EPA comments, in writing, shall be responded to and changes made, as appropriate, in the subsequent deliverable.
- Figures 8.1a, 8.1b, 8.1c and 8.1d libraruse the review procedures. As appropriate, the Work Defendants shall include a discussion about how the "Accepted," "Accepted as Modified," and

"To Be Studied" items are included, at the time the subsequent deliverable is submused.

8.2 ERGIECT PROPOSAL

Consideration for each new improvement identified in the SCIMAMS Master Plan begins with preparation of a Project Proposal. This proposal will be used by EPA in making a determination of whether all or a portion of the improvement will be implemented. The proposal will also provide a recommendation and supporting information on the type of

1) TYPE I REVIEW PROCEDURES

#31 MONTHLY PROGRESS REPORTS

- 1. Each Monthly Progress Report will include chapters for at least the following items:
 - lastoduction.
 - Size and Systems Monitoring Results by activity type (e.g., perimener gas extraction system, liquids collection) using co-MIS summary forms including preliminary interpretation of on of data when possible. Specific dam will be provided as appendices.
 - · Maintenance and repairs accomplished.
 - The states of improvements being accomplished.
 - The monthly progress report for the LTS, when appropriate.
 - Public and agency interactions.
 - A report on special actions or activity startum placeast for the next mouth.
 - Deliverables or Project Proposals submitted during the month
 - A list of deliverables to be submitted and their corresponding submittal dates for the following monds.
 - QAQC data monived during the month.
 - A report on any amenicipated problems encountered or emergency actions undertaken and their resolution, including entirests of their potential impacts to system integrity, schedule or indeed
 - Scholule and cost update in relation to the annual projections.
- An addendum to prior months' reports to include comments received and responses to those comments.
- Identification of significant budget increases.
- 1~ MINO (24) PM

~8Y-

- 2 The monthly progress reports for December, March, June and September shall include a quality assurance report. This report shall contain information which demonstrates that the Work Defendants are complying with the requirements of Section XII (Quality Assurance/Ouabry Control) and the OA/OC Plan established pursuant to this Decree
- 3. EPA comments to any prior Monthly Progress Report will be submitted to the Work Defendants' Project Coordinator. EPA committees received more than two weeks prior to a monthly report will be addressed in that month's report, other EPA comments will be addressed in the following month's report

8.3.2 CLOSEOUT REPORTS

- 1. An Improvement Closeout Report will include at least the following information
 - Introduction.
 - As-built plans and specifications. Quality Control Records.

 - Explanation of significant changes which occurred compared to the design, and the potential impact of those changes on performance
 - Discussion of actual expenditures vs. budges projection
 - Importance of the project experience to future project activities
 - Suggestions for modifications which should be made to future construction of similar or related items

8.3.3 TRANSITION PLAN

1. The Transition Plan content, described in Chapter 4.0, will be used to prepare the Prefinal Plan. A Plan Outline is not required.

8.4 TYPE 2 REVIEW PROCEDURES

8.4.1 RELATIVELY SIMPLE DESIGNS

- 1. Profinal Designs shall include at least the following nems:
 - Permits and approvals obtained, where appropriate

 - Access plans, where appropriate.
 Final flow diagrams and preliminary P&IDs, when appropriate
 A General Arrangement Plan shdwing the improvement in relation to other existing or planned conditions.
 - Minimum dimensions to property lines, when appropriate
 - Design plans pulsable for construction.
 - Special Conditions and Construction Specifications.
 - Engineering calculations, when appropriate
 - A Startup Plan, when appropriate.

Rev. 8/18/06 (3:50 PM)

3

- Addends to the Safety, QA/QC, Sampling, Operations Manual, as appropriate.
- A construction schedule indicating significant milestones.
- · Value engineering where potential for substantial cost savings exists

The prefinal design submission shall represent at least the 90 percent design completion level

2 Final designs shall include all of the items in the prefinal design package with changes made, as appropriate, reflecting EPA Comments.

4 2 ORIGINAL PLANS

- Required items to be included in original plans are provided in Chapter 4.0, Scope of Work for Pretransition and Transition Activities. Types of original plans include:
 - Safety, Health and Emergency Response Plan
 - · QAAQC Plan
 - Interim Operations and Budget Plan
 - Project Proposal Plan
 - · SCMLMS Plan
 - · Operations Manual

4.3 ANNUAL REVISIONS TO PLANS

- 1 Each year the SCHALMS and Operations Manual will be revised (updated) to reflect: (1) changes which have occurred at the site and (2) plants for the upcoming year. As a part of this process, the Safety and QA/QC plans shall also be revised, if appropriate, to reflect changes which have occurred.
- 2. Each portion of the plans (see Chapter 4.0) will be reviewed and modified by the Work. Defendants to incorporate addends prepared during the prior year, and to reflect other changes, determined to be recessary to make the plans current for conditions at that time.
- 3 When improvement designs or significant maintenance repairs are made during the year, addendum to the general plans shall be made to direct related field activities for the remainder of the year. Those addends shall include discussions for each relevant section in the plan. The addends for each year will be incorporated into the annual revision.

An 1/11/00 (2:41 PM)

\$44 WORK COMPLETION REPORT

- Prior to the completion of the Work outlined in this Scope of Work, and in accordance with the Decree, the Work Defendants shall submit a Work Completion Report. The report shall contain at least the following items, as appropriate, (with the exception of all data collected of developed during the 3 months prior to completion of the work which shall instead be submitted to EPA in the Monthly Progress Reports)
 - Introduction
 - Description of all SCM/LMS facilities.
 - Summary of SCM activities currently being performed
 - Last of manuals, plans, reports and current addendum to those documents which are being used for the SCM/LMS activities.
 - List of potential site improvements not yet completed.
 - Manpower allocations and cost summaries for the past 12 months of SCM/LMS activities.
 - SCM/LMS monitoring data summery for the past 12 months
 - Description of the phase out activities required
 - Certification that the Work has been completed in accordance and in full compliance, or that Work Defendants have otherwise satisfied their obligations in accordance and in full compliance, with the Decree
 - If Work Defendants' obligations under the Decree terminate before completion of the Work, this report shall also include a description of and status report on Work activities yet to be completed.

8.5 TYPE 3 AND 4 REVIEW PROCEDURES

8.5.1 MODERATELY COMPLEX AND COMPLEX DESIGNS

- 1. The Project Proposals shall include the items discussed in Subchapter 8.2
- The Prefinal and Final Design Packages requiring Type 3 and Type 4 Review Procedures have
 the same coment requirements as designs requiring Type 2 Review Procedures (Subchapter
 8.4.1).
- 3. The added design steps (Preliminary and/or Intermediate) also require data to be submutted for each of the topics required for the Prefinal Design Package. The level of detail provided should reflect approximately the following levels of design completeness:
 - Preliminary Design: Approximately 30 percent
 - · Intermediate Design: Approximately 60 percent

Rev. 8/18/88 (2.4) PM)

I 6 LIS DESIGN. CONSTRUCTION AND STARTILE

- Subchapten 6.4.1 through 6.4.3 describe the predesign, design and construction procedures required for the LTS. The types and mambers of design review packages shall be determined hand on the recommendations provided with the predetign package.
- The seview procedure is illustrated in Figure & Id.
- 8) EMERGENCY REPAIRS
- Refer to Safety. Health and Emergency Response Plan for immediant actions required

.)

- Coordinator shall devotop a proposed plan for further scrien, if secessary and appropriase, and submit is to EPA for approval. Such plan shall be automitted within 7 days unders otherwise agreed to by EPA after consultation with the Work Defendants. Such plan shall include at After immediate health and safety concerns have been addressed. Work Defendant Project kun de following imme:

Site personnel regions that the Sommont with west originally drilled as part of the gas extraction system, but was never exceeded to the system. He seems surps in the secretaries perdon of the OS site have been experted. One deep manistring well, Well R, is also bessed in Area I.

Well R consists of a Ginch exting extending from the top dark of the findfull, through the refuse fill, and take the pative material below the fill. Well R was sounded on September 24, 1964, and showed 10 feet of liquids present as the bettom of the well. The cell was originally constructed to monitor the water beneath the beston of the fill.

A ter butters was constructed by EPA as an emergency response action in early 1967 along the nouth/nouthersteen perimeter of the handfill in Area I to support the landfill slopes. As part of the butters construction, a tackness collection system was instituted consisting of collection pipes not three 1,000-gallen sterage stants designed to capture backless agenties over the site benedary. These sterage tanks are not currently connected to the embelogules backness manifold.

There has been no technic descend in the tanks along their installation in February, 1987.

and gravel pack designed to directly interespe the beachste.

All of the wells are essected to the perimener gas extraction system header line by a 1-1/2 lach PVC ripper collection time to extract gases from the well casing bove the leachase. Leachate from 5 of the 2 wolls is pumped by electrically-powered impulser-type tobercrible pumps. The main prints-circuit braken for these pumps are becased at the furth-circuit braken for the side. One of the 2 with it pumped by a unasually-personal powership at 146 pump which is applied by the six-cooled single singe 5was compresser because is the auxillary flare stations. This well was compresser because is the auxillary flare pursaine compound. This well was conversed from a submersible pump to the personality pump due to frequent from oil, grease, and solids building.

The 2 newest with are engined with automatic parametic species pumps which are supplied by the 2 positive-lightecomest responsating statistic compression factorial in the natifiery flace matics compensed. All eight with are connected to a fineth collection analysed for distincts to the in the underground units in Area III described in Supparagraph 12.9 of this metian.

Four disposal bariage which eater is Arns II are not enamered to the manifold and underground tanks. In the past, these berings have been pumped by vacuum treets, although no pumping record our available. Recent lavoutigation has indicated that the enalogs in all 4 berings have absured at deprise reaging perwess. 5 and 28 fort

Area III, the south/southwaters serser of the sist, escalets of a series of shallow less than 5 foot deep) buried performed pipes and treaches which discharge by

Parlianter for the neath parcel. These probes were issuated by Oli around the perimeter of the neath parcel. These probes were issuaded to meniter issualing in migration across the benedary and west therefore pleced primarily is native soil outside the refuse fill area. Probes are constructed of PVC pipe and polytichylese trabing, and are attached as to thereigh 32 for a testal of 35 probe locations. Many probes are attached at mobilishe depth, generally 5, 15, 23, 3a of 45 feet, but none have here than 5 acrossed depths and 17 have only a single depth. Difficulty Explay. Thereights and 17 have only a single depth. In a factorished by the California Weste binaspaners have a dealing to the prediction of an autistic depths between 3.3 and 49 feet, and are attached 11 through 11A. There probes are most to absolute the residential.

seighberberk.

Month Parall and a Fifteen probes were installed as a jungle shallow depth on the north parall by Oil. These probes were meant to indicate the protects of haddling as in the filled one of the acute percent which has no gas control system. Probes not seember N-1 through N-12, probes 3, 4, 12, 13, and 15 have been described or best and are no imager manifectual.

meninering probe system, known as Gas Meninering Wells (GMF), have been lessified by RPA on the north and much parent. Each well contains from 2 to 6 probes at different depth. The north parent commiss 13 of these wells with probe depths ranging from 20 to 120 fort. There are 15 north parent wells designated with public probe depths ranging from 20 to 120 fort. There are 15 north parent wells designated with public broke depths ranging from 20 to 120 fort.
